FIRST DESIGN CONCEPT

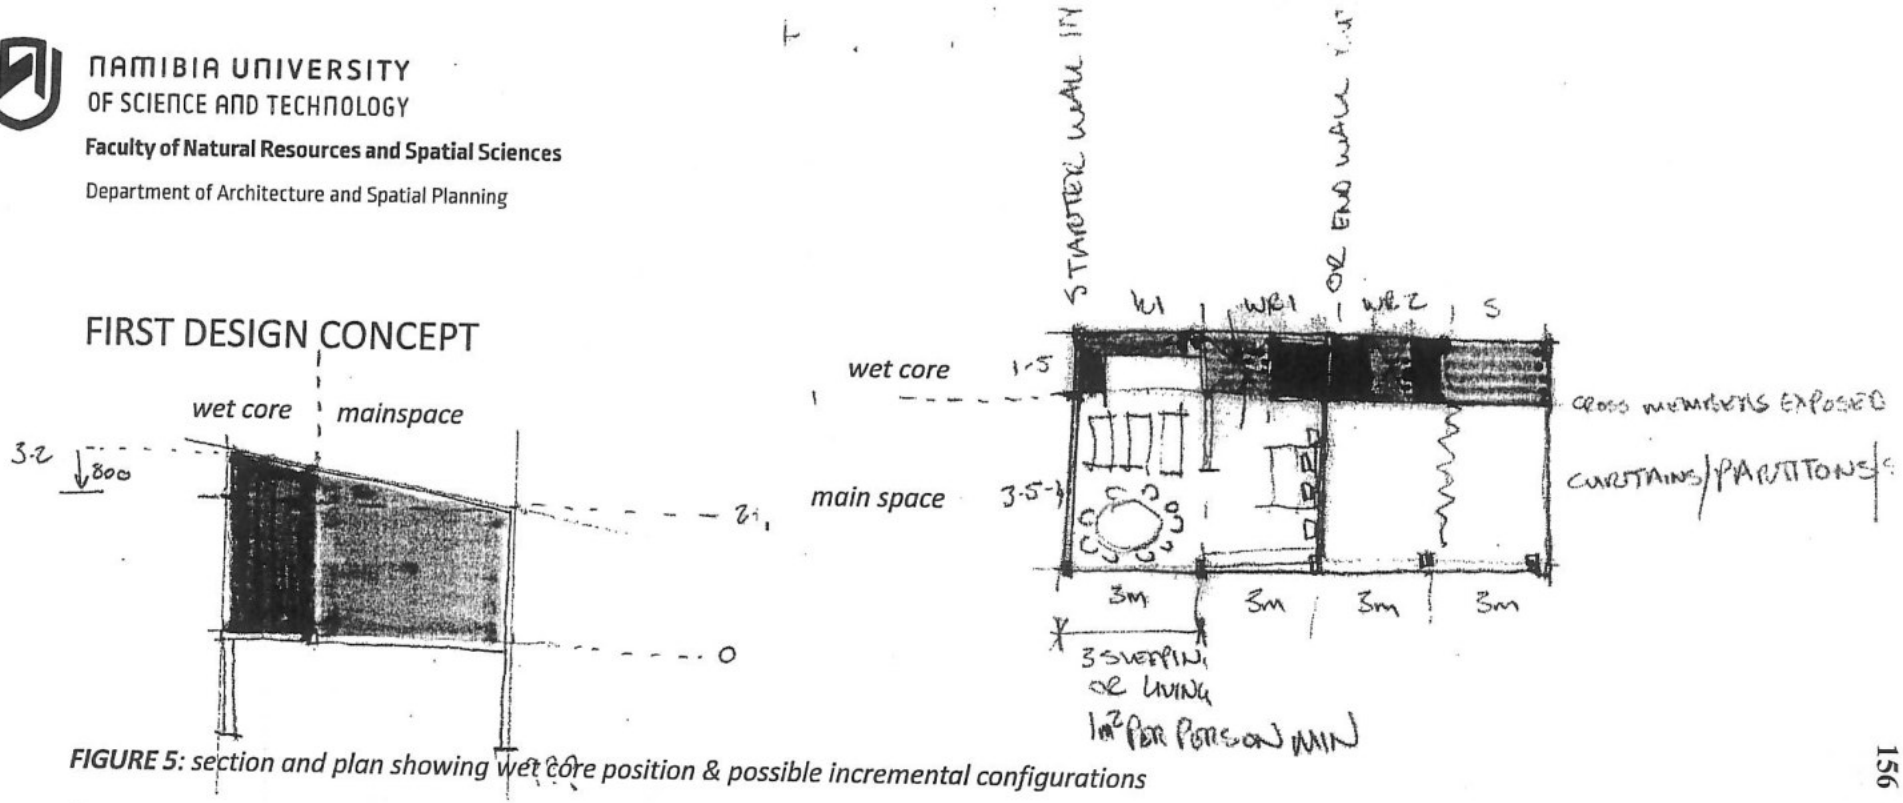

FIGURE 5: *section and plan showing wet core position & possible incremental configurations*

For maximum flexibility the house would be a steel frame structure. In future applications each building element could be "filled-in" over time (floor, roof, walls, sanitary fittings, windows, doors)

For economic and practical reasons service areas like kitchen and bathrooms should be lined up to one side of the house. These are viewed as "plug-in" units (a reserved space which could house a variety of configurations)

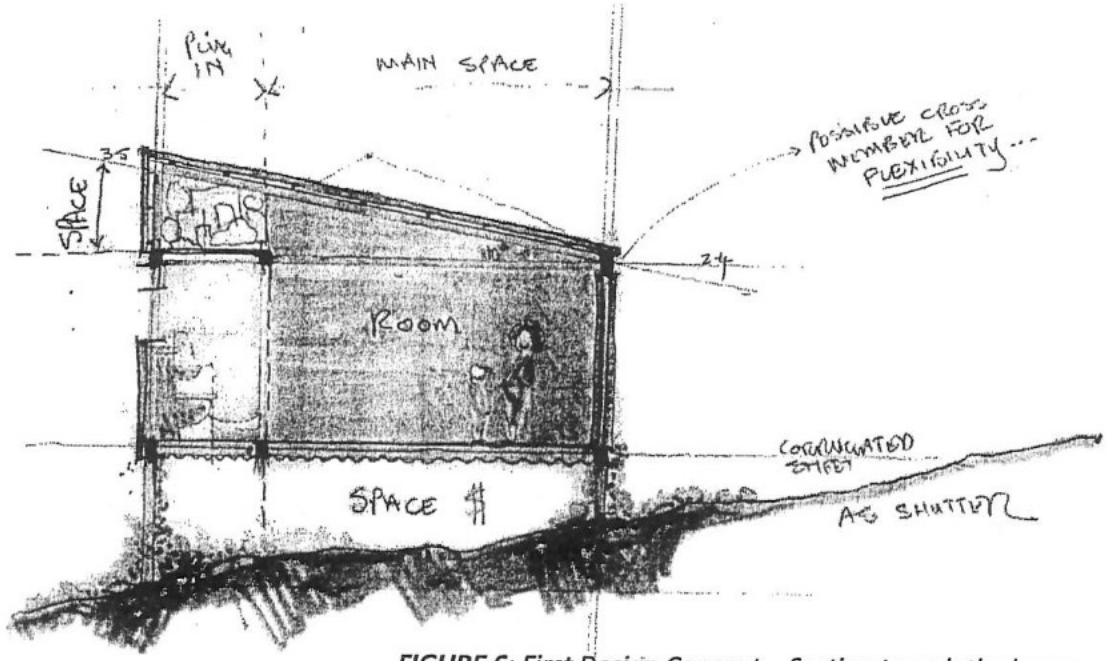

***FIGURE 6:** First Design Concept – Section trough the house*

EARLY SPATIAL DESIGN DECISIONS WERE BASED ON MATERIAL DIMENSIONS AND ERGONOMICS:

- Using increments of standard steel lengths 6m, and board sizes of 1220x2440
- Introducing a sloped roof of min. 10 degrees so that corrugated sheet profile can be used
- Space for a mezzanine within the slope, over the wet core, 1220mm wide
- Minimum mezzanine clearance of 1m so that it could be used as a sleeping space
- An internal room width of 3m and a minimum ceiling height of 2.4m
- A top chord measurement of 6m resulted in an overall length of 5860mm, less 1220 allows 4640mm for the main space

PLAN FOR EMERGENCY RELOCATION

For the purpose of the emergency relocation housing a starter module was developed and costed. The unit combines space for a kitchen and bathroom area

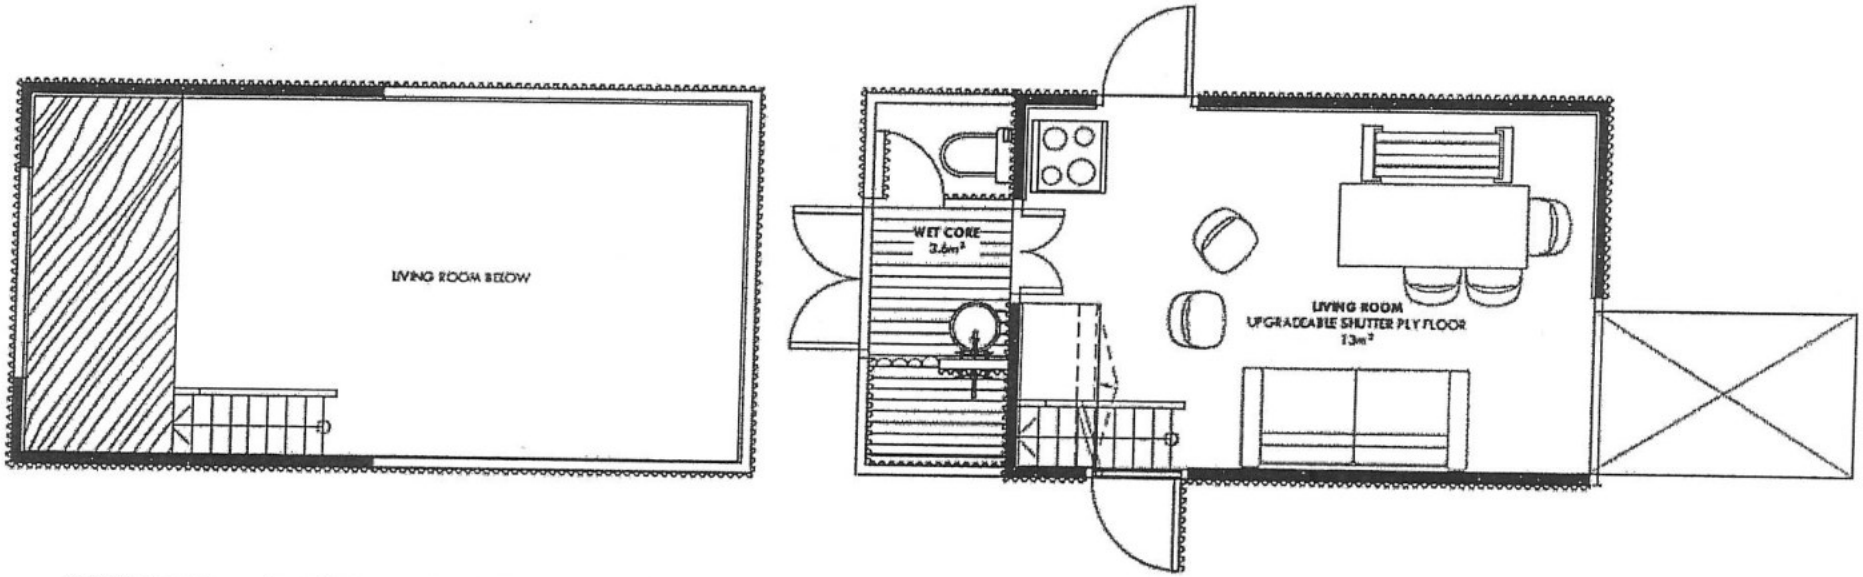

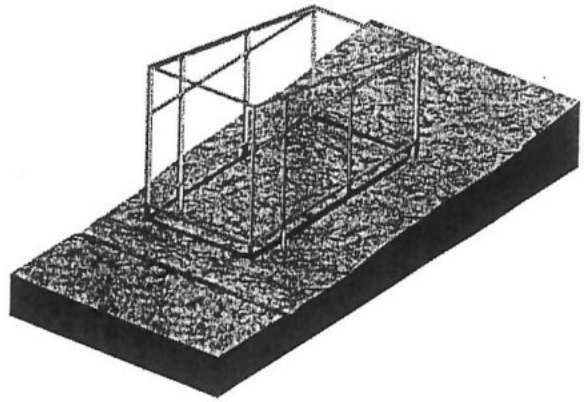

FIGURE 7: *Upper Level & Lower Level Floor Plans of starter module for relocation.*

Market related rates for steel include material and assembly costs.
Other fittings and materials are off-the-shelf material costs obtained from suppliers in September 2019 and do not include assembly.
External works and bulk services are not included in this cost.

UNIT PERSONALISATION AND INTERIOR APPROPRIATION

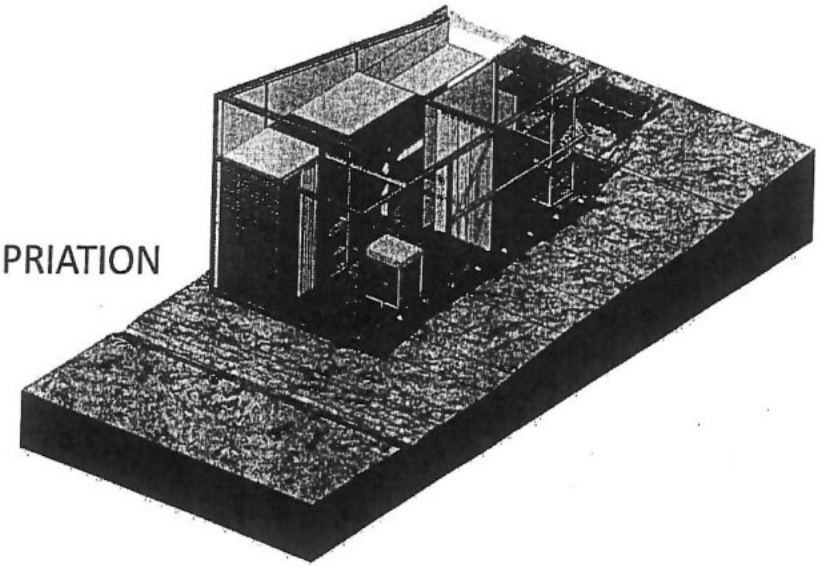

FIGURE 8: *Perspective showing the unit's potential interior development over time*

The frame structure lends itself to easy adaptation; allowing residents to really upgrade and grow their homes according to their own needs over time. This incremental growth can me as quick and small or fast and big as residents can afford.

This process means smaller and more attainable financial benchmarks for individuals. This in turn would lead to frequent achievement of goals and added incentive for saving and investment in their future.

Not only is the interior flexible but the unit itsself can be easily expanded

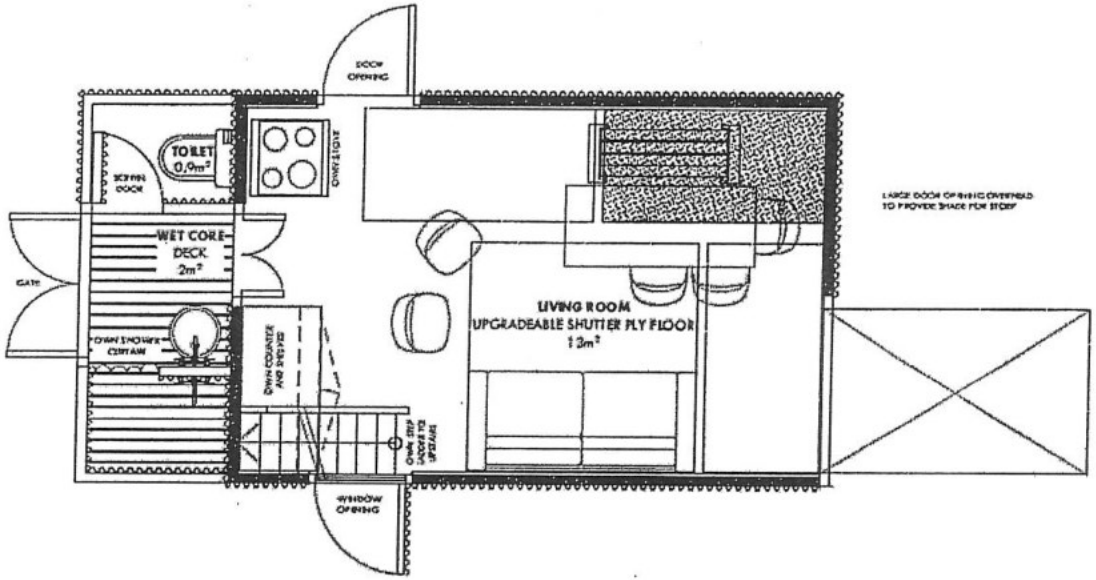

FIGURE 9: *Starter Unit Floor Plan showing provisions for conversion to sleeping area*

The first starter module requires the Living Room to be adapted at night for sleeping:

- The table and chairs could be moved to an allocated space in one corner (hatched area on plan)
- The room opens up to allow sleeping space for at least four grown-ups or a number of children
- The 1.2x3m mezzanine extends space available for sleeping on the upper level

The steel structure allows for easy addition of these standard modules to form a larger house

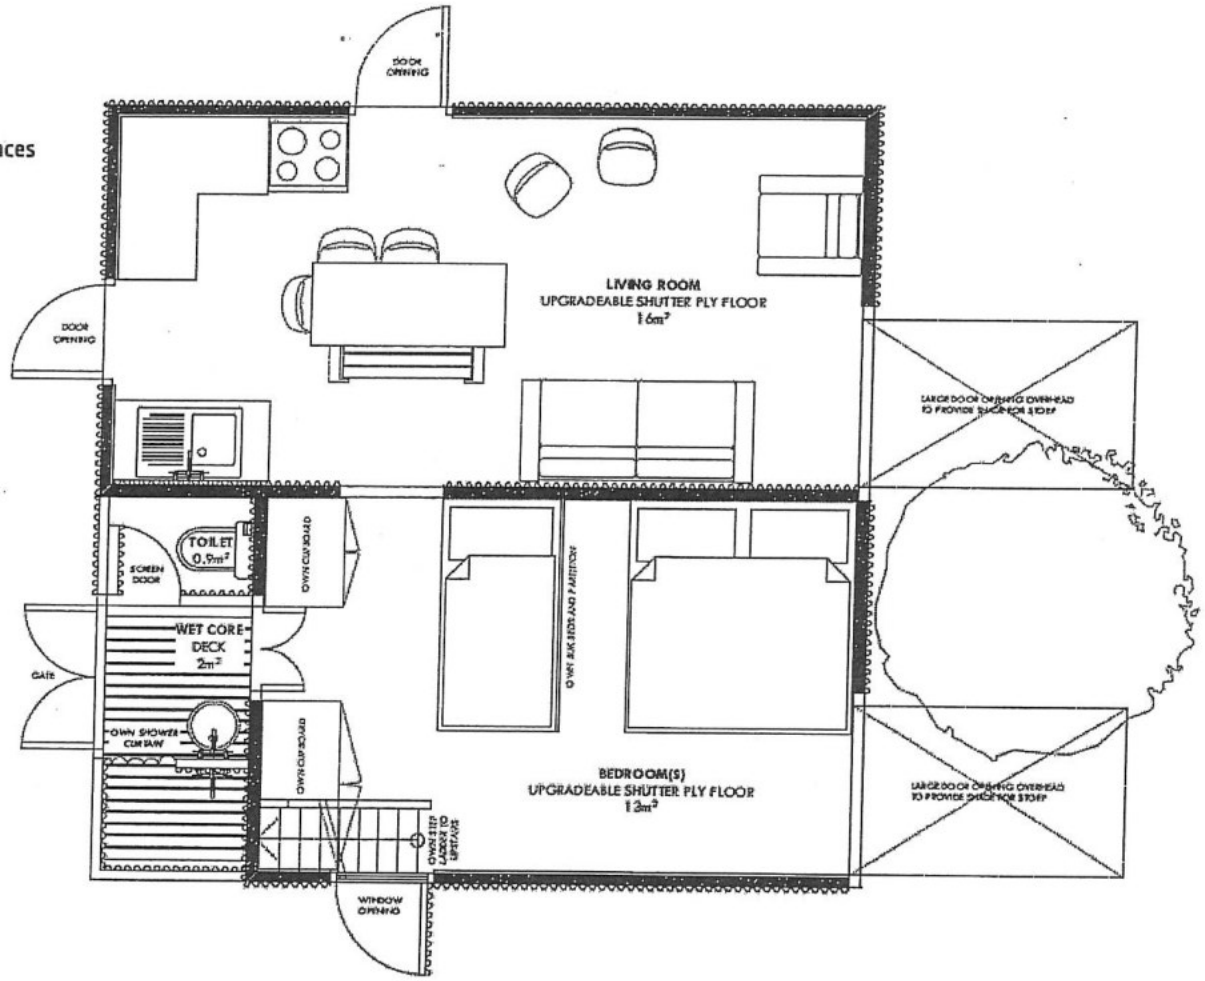

***FIGURE 10**: Plan showing conversion of starter module into a bedroom wing and new living room expansion*

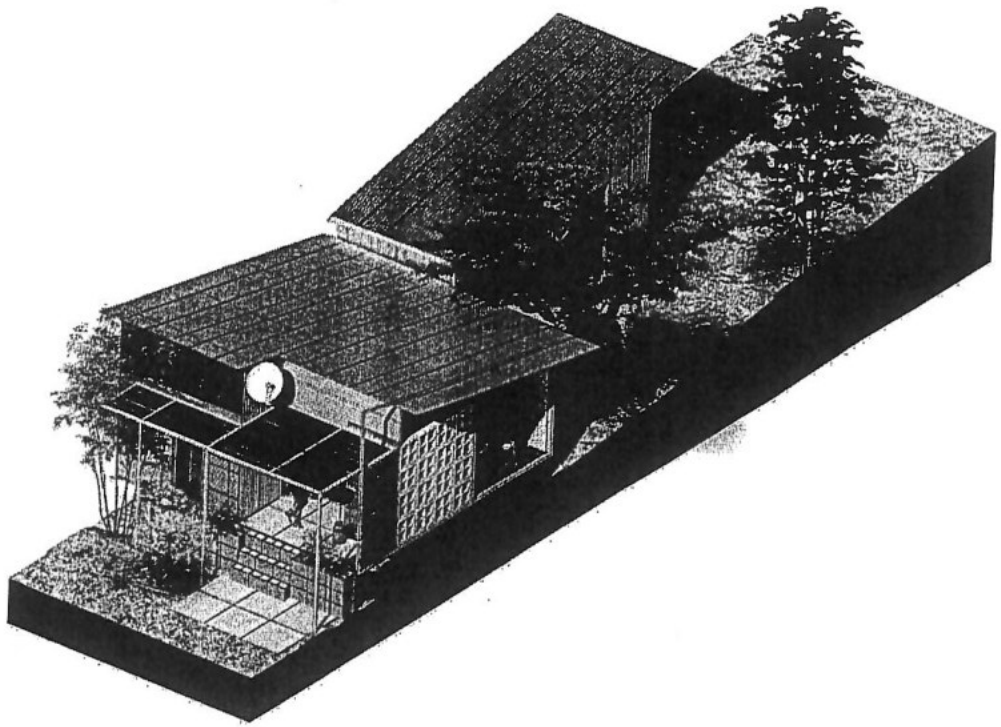

FIGURE 11: *Perspective showing the unit's potential over time. three modules as developed over time*

Over time the result is an urban fabric that is varied, as well as personal to each household in the settlement

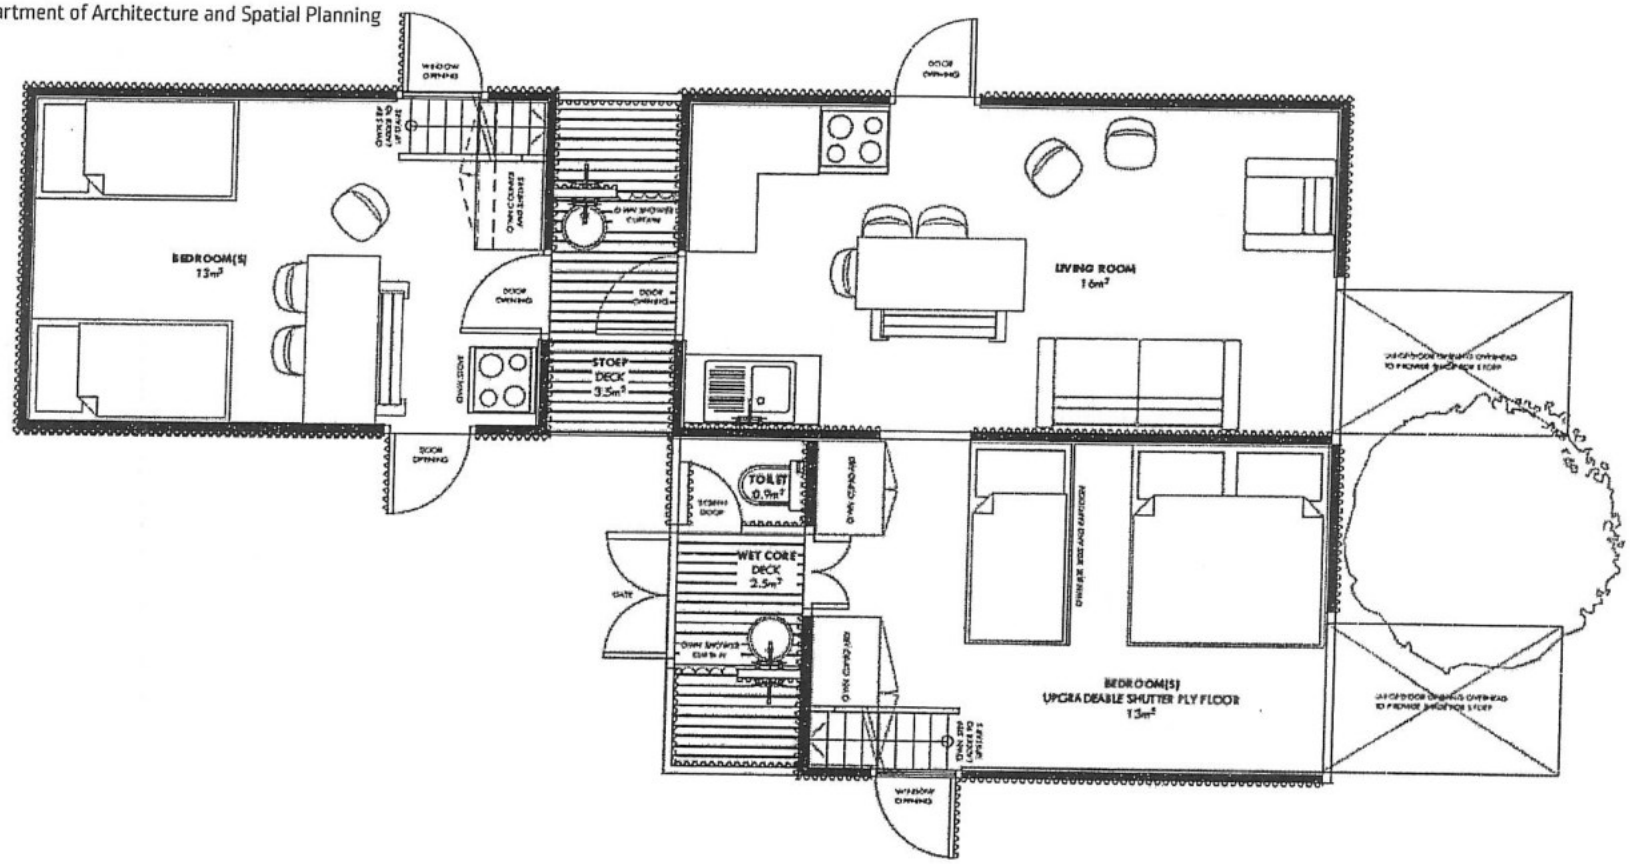

***FIGURE 12**: Plan showing further expansion of a third module to house additional Living and Bedroom space*

THE SETTLEMENT

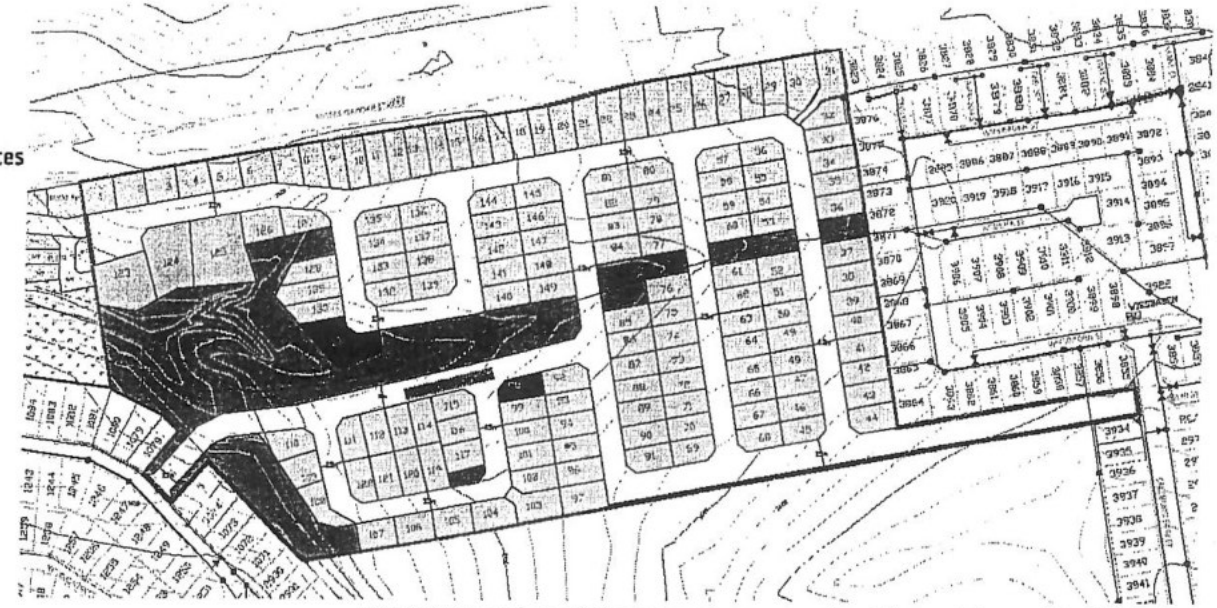

***FIGURE 13**: plan of the current proposed settlement layout in Otjimuise*

An unapproved layout exists for the settlement in Otjomuise.
It is deemed inadequate for various reasons:

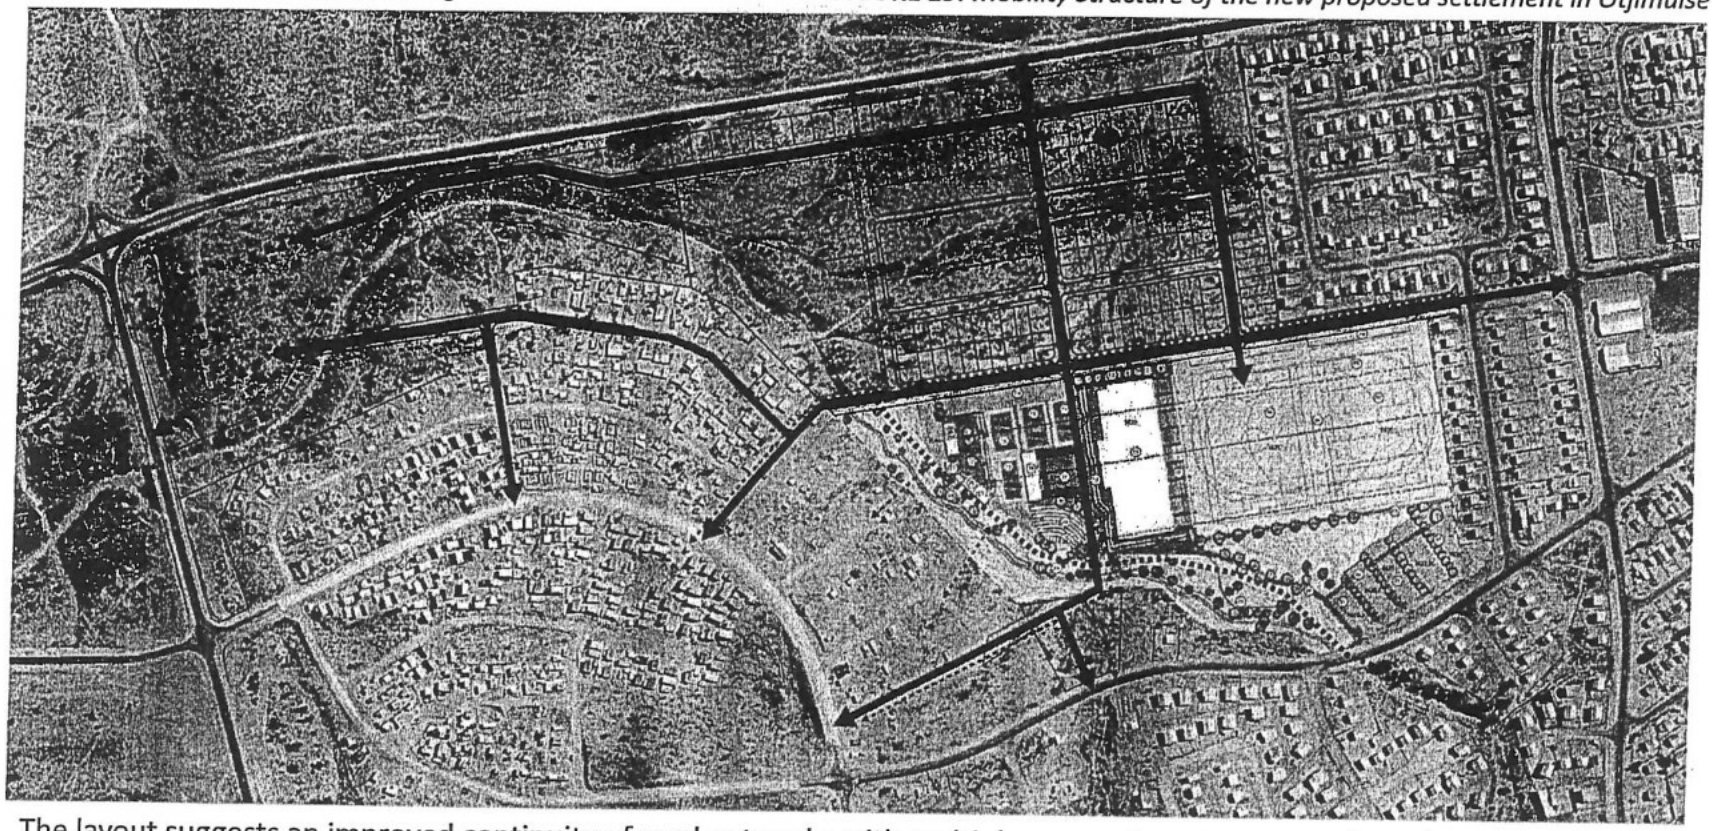

- The layout consists of 84% Single Residential Plots which is not in line with the City of Windhoek Development & Upgrading Policy of July 2019. The Policy refers to an ***indirect densification*** *approach where* ***±60%*** *of the population in a given residential development live in a* ***high-density*** *set-up (apartments designed at human scale, sectional title housing/row housing and semi-detached housing) whilst the remaining* ***±40%*** *live in* ***single residential*** *housing on standard sized plots.*
- Plots are moslty east-west facing.
- Plots do not front onto the Public Open space which becomes a concern for adequate and safe use of these areas.
- There are excessive turns and an overall lack of street continuity
- Limited land-use mix

FIGURE 14: *Revised block layout of the new proposed settlement in Otjimuise*

The revised settlement plan takes a proposed sports facility into consideration. Most new plots would be north-south oriented narrow plots to enable row housing with preferable orientation, semi-private front yards and private back yards.

FIGURE 15: *Mobility Structure of the new proposed settlement in Otjimuise*

The layout suggests an improved continuity of road networks with multiple connections to surrounding neighbourhoods. A wide range of mobility is considered to include a *Riverwalk*, non-motorized transport and public transport options

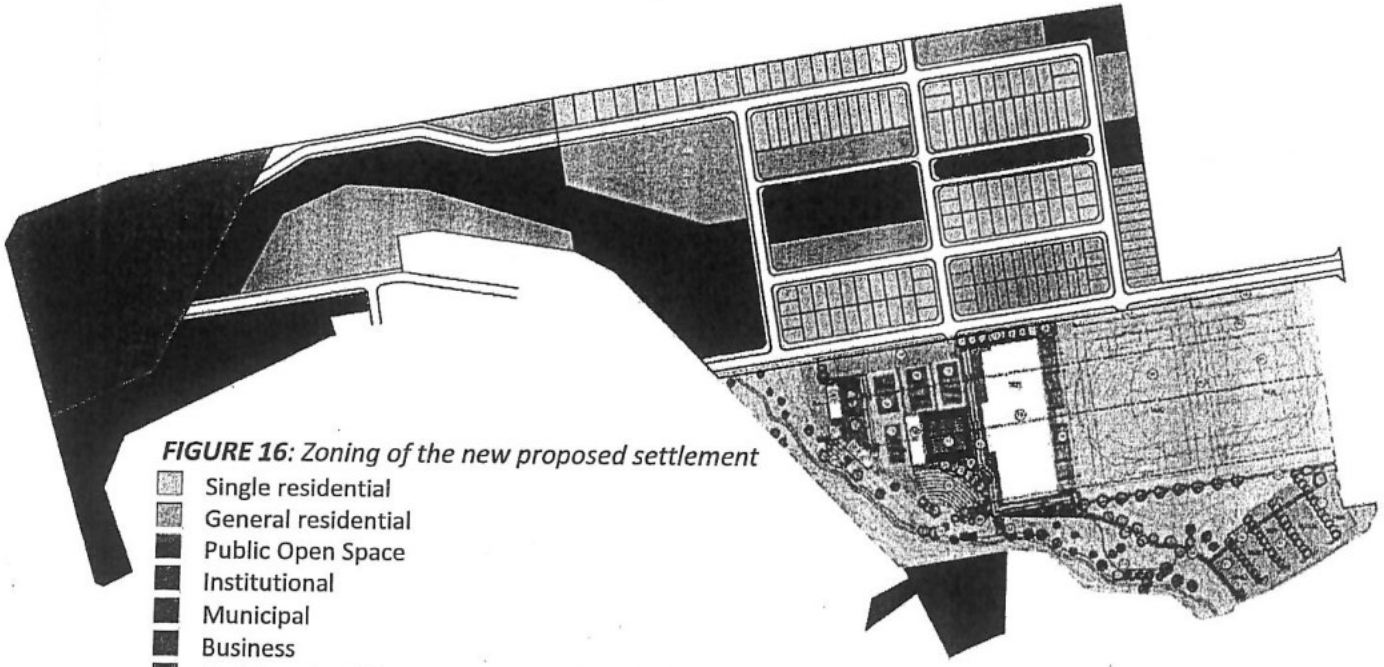

***FIGURE 16**: Zoning of the new proposed settlement*

The layout proposes a mixed-use neighbourhood with a wide variety of land-uses.
It provides for block erven for group saving schemes, general residential for medium-density pilot projects and a larger portion of land which could be developed independently in future.
Current parcels of informal settlements should be integrated into the scheme for future in-situ upgrading

FIGURE 17: *table comparison of settlement densities and area ratios*

NEW PROPOSED SETTLEMENT LAYOUT					
	Density	Plot areas	No of Units	% of Residential Units	% of Total Land Area
RESIDENTIAL		44584	293	100%	49%
Single Residential		23670	95	32%	26%
	200 m² +		81		
	300 m² +		14		
General Residential		20914	198	68%	23%
	1:50	1965	39		
	1:100	5840	58		
	1:100	2385	23		
	1:100	2385	23		
	1:100	1225	12		
(future individual)	1:150	4769	30		
(future individual)	1:150	2345	13		
BUSINESS		850	1		1%
INSTITUTIONAL		759	1		1%
PUBLIC OPEN SPACE		17185			19%
		5050	1		
		1848	1		
	(river)	10287	1		
MUNICIPAL (market)		1985	1		2%
STREET		24977			28%
TOTAL		90340			100%

CURRENT PROPOSED SETTLEMENT LAYOUT					
	Density	Plot areas	No of Units	% of Residential Units	% of Total Land Area
RESIDENTIAL		49174	171	100%	54%
Single Residential	300 m2 +	46345	143	84%	51%
General Residential	1:100 (assumed)	2829	28	16%	3%
BUSINESS		306	1		0%
INSTITUTIONAL		683	1		1%
PUBLIC OPEN SPACE		15795	6		17%
STREET		25072			28%
TOTAL		90340			100%

The new Proposed Layout shows a large increase in the overall number of residential units
Future costs of servicing land in relation to number of units is largely reduced
Besides more varied land use; the layout proposes densities for residential zoning in line with the DUP

***FIGURE 15:** Plan of a a well-connected settlement with functional Public Open Space*

Public Open Space would be safer and more useful as plots face onto them. Neighbourhood-scale sports and recreational facilities should be integrated into these spaces while higher order sports facilities are planned for the larger settlement area

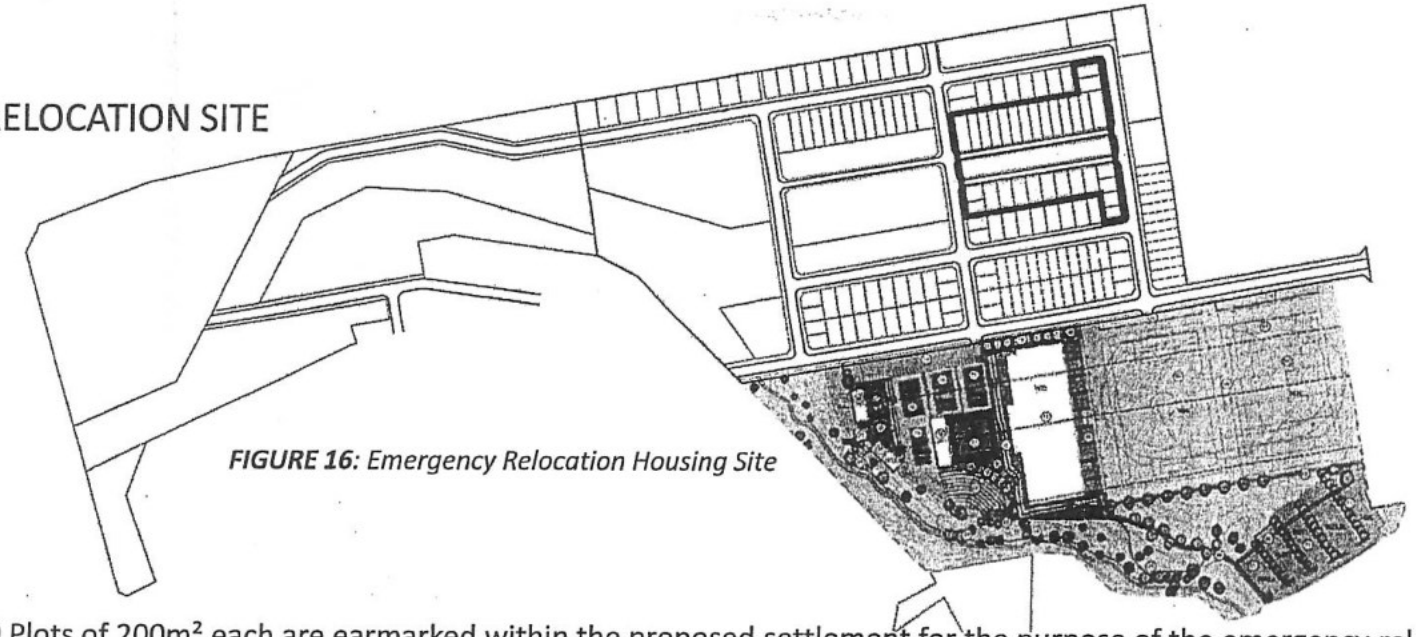

FIGURE 16: *Emergency Relocation Housing Site*

30 Plots of 200m² each are earmarked within the proposed settlement for the purpose of the emergency relocation:

- Plots would be arranged in two rows around the shared Public Open Space where the existing main sewer line is located.
- 16 erven would have 10.5m frontage: which could accommodate up to 3 modules of the proposed housing unit next to each other, plus 1.5m passage and one shared boundary wall
- 12 erven would have 7.5m frontage: which could accommodate up to 2 modules of the proposed housing unit next to each other, plus 1.5m passage and one shared boundary wall
- 2 corner erven of 300m²+

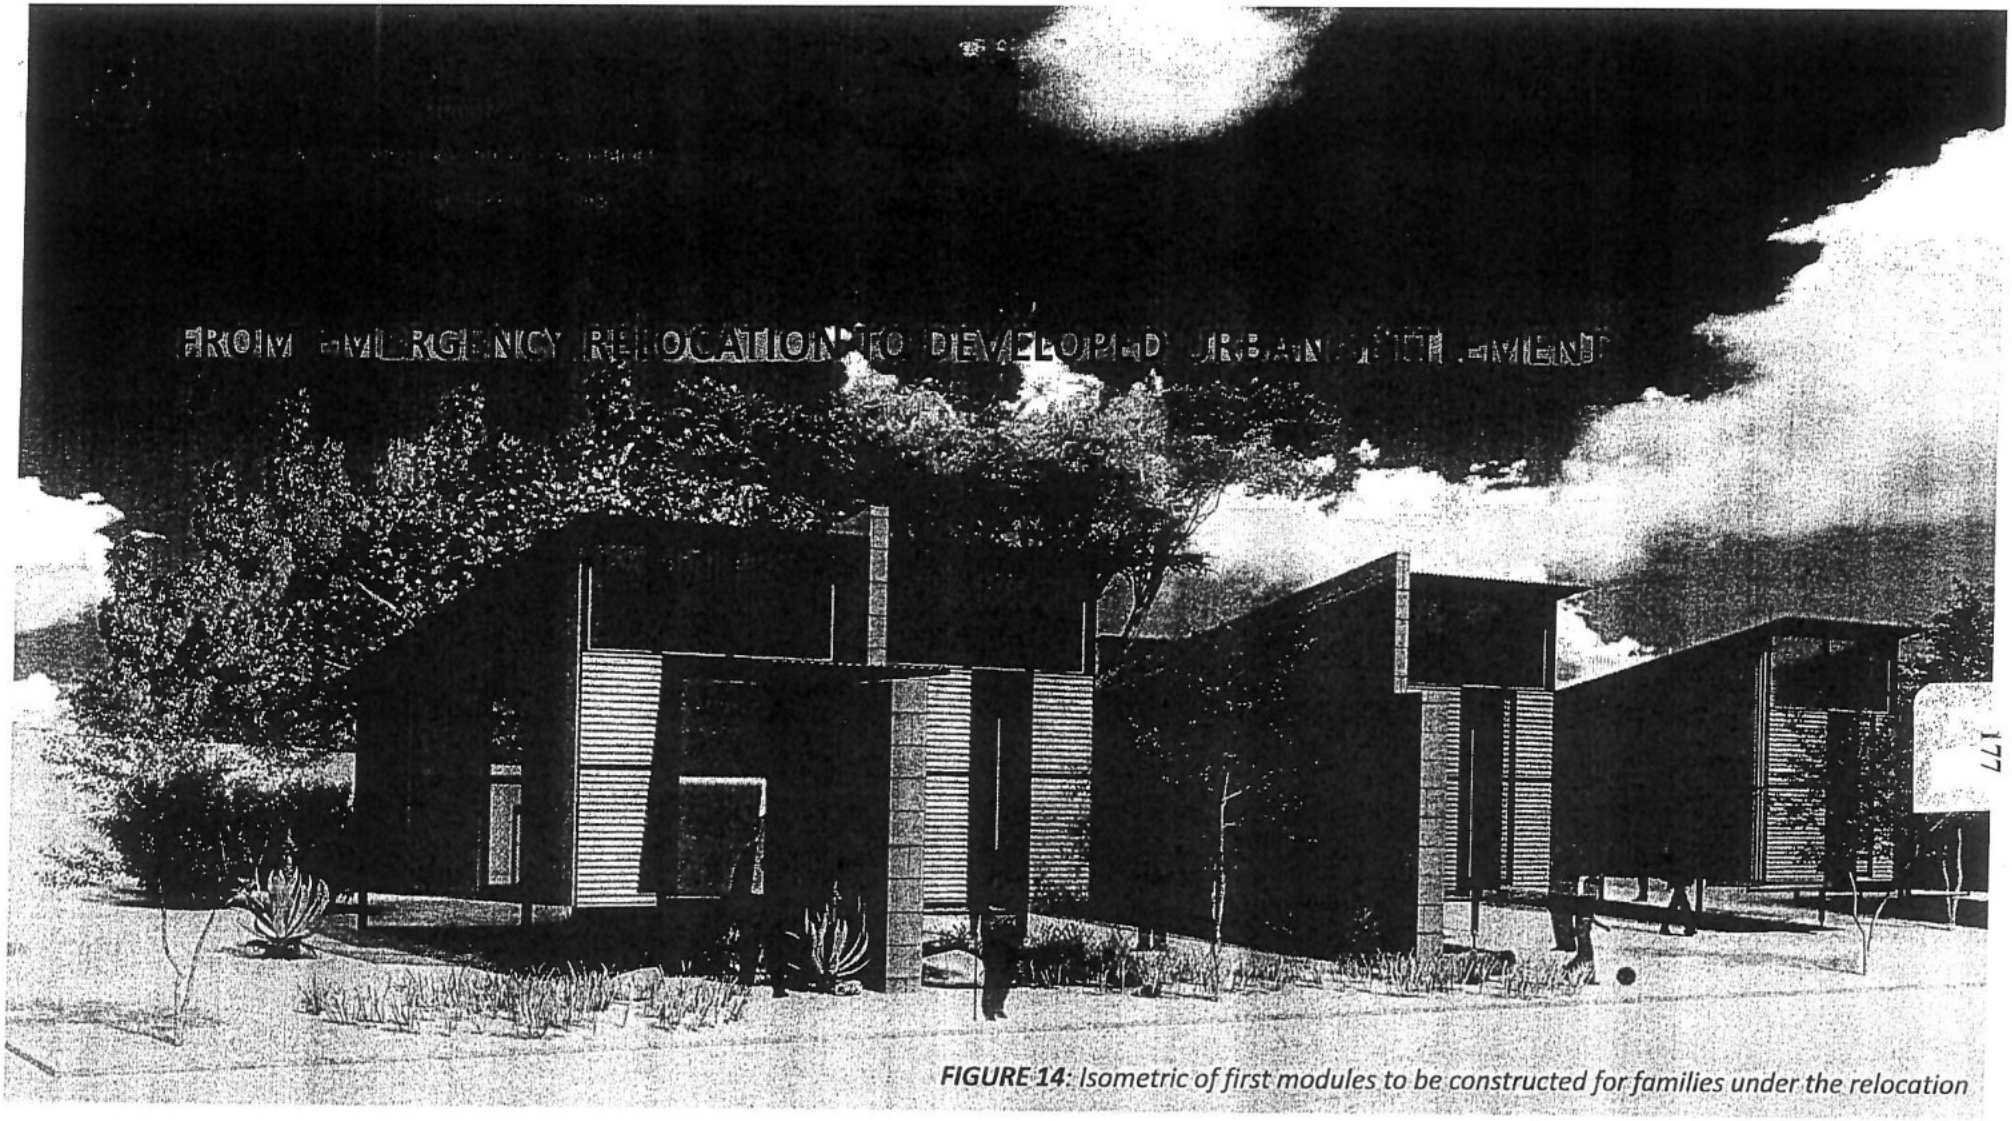

FIGURE 14: *Isometric of first modules to be constructed for families under the relocation*

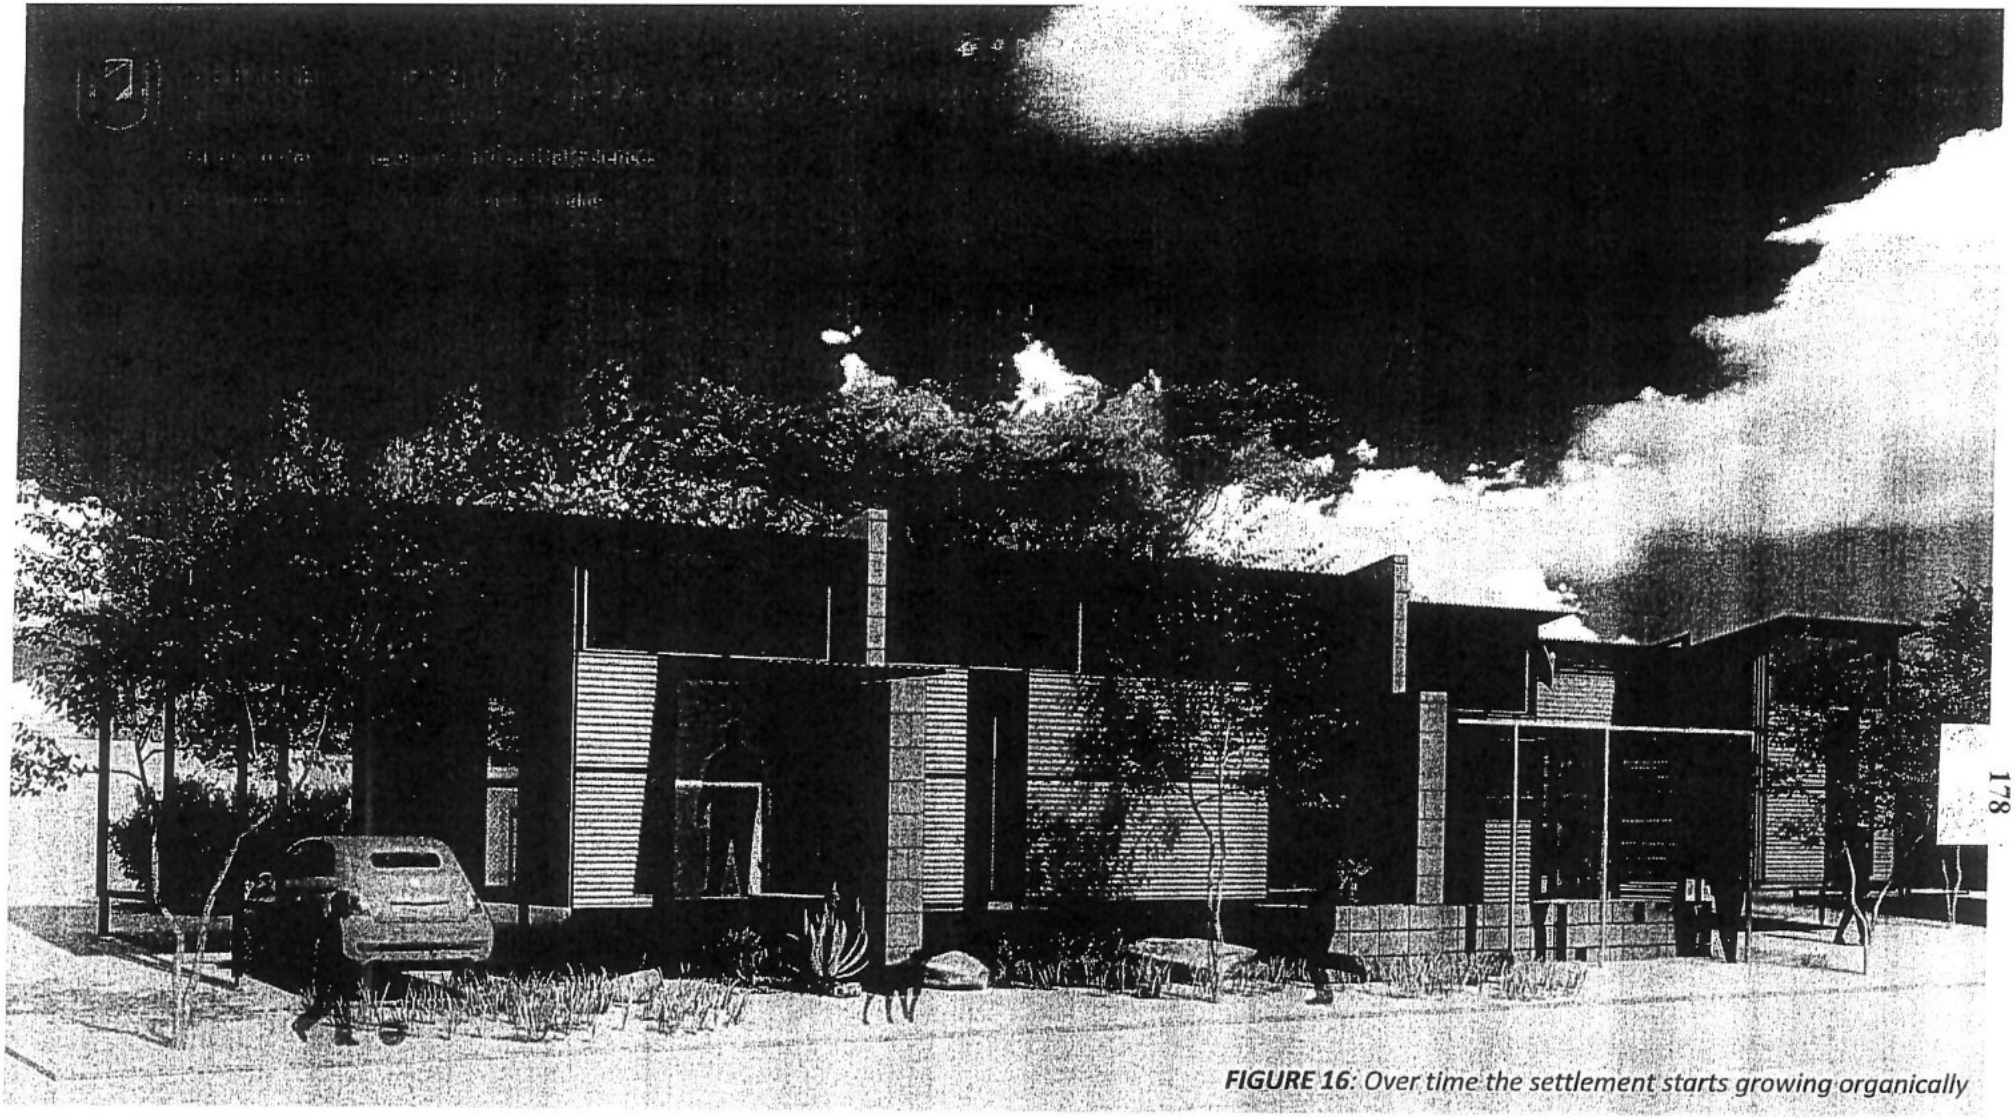

FIGURE 16: *Over time the settlement starts growing organically*

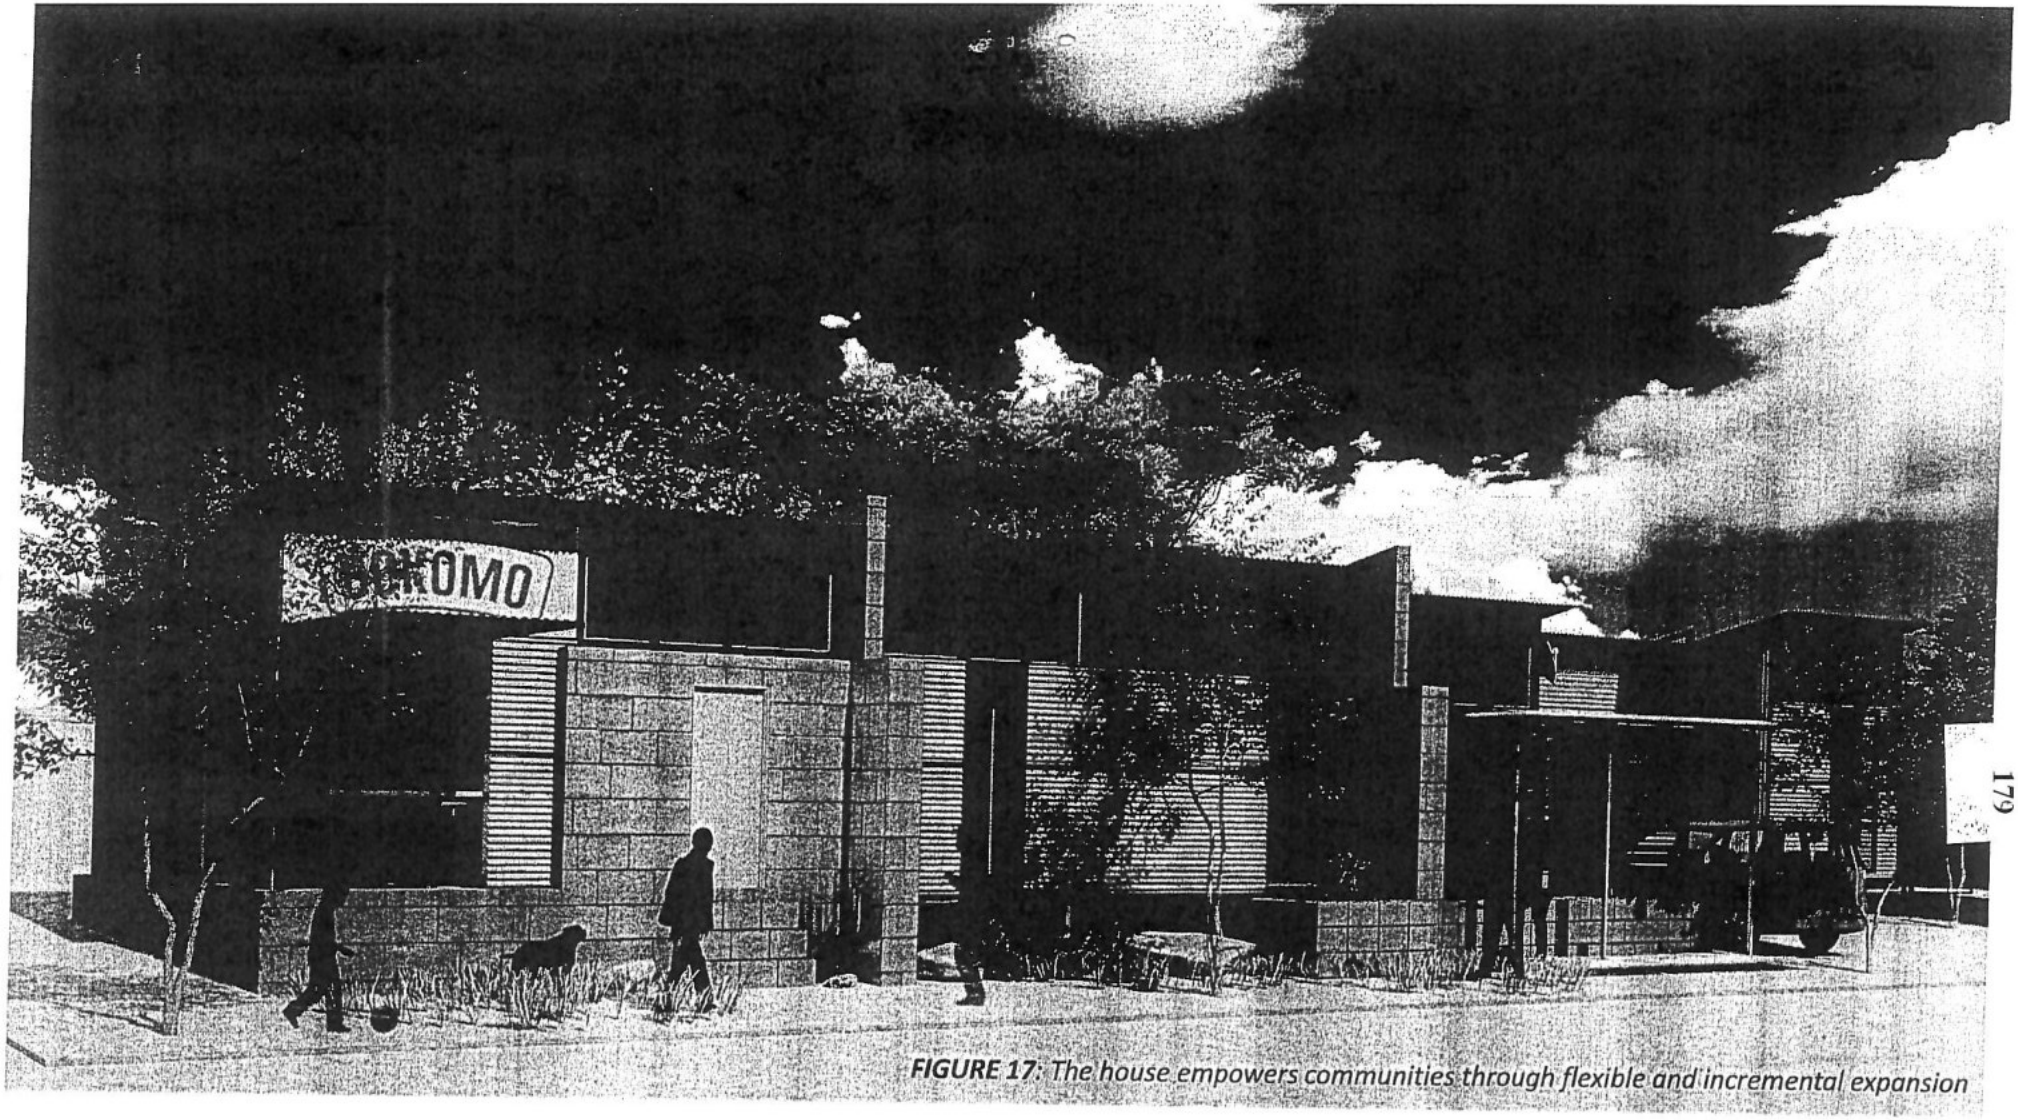

FIGURE 17: The house empowers communities through flexible and incremental expansion

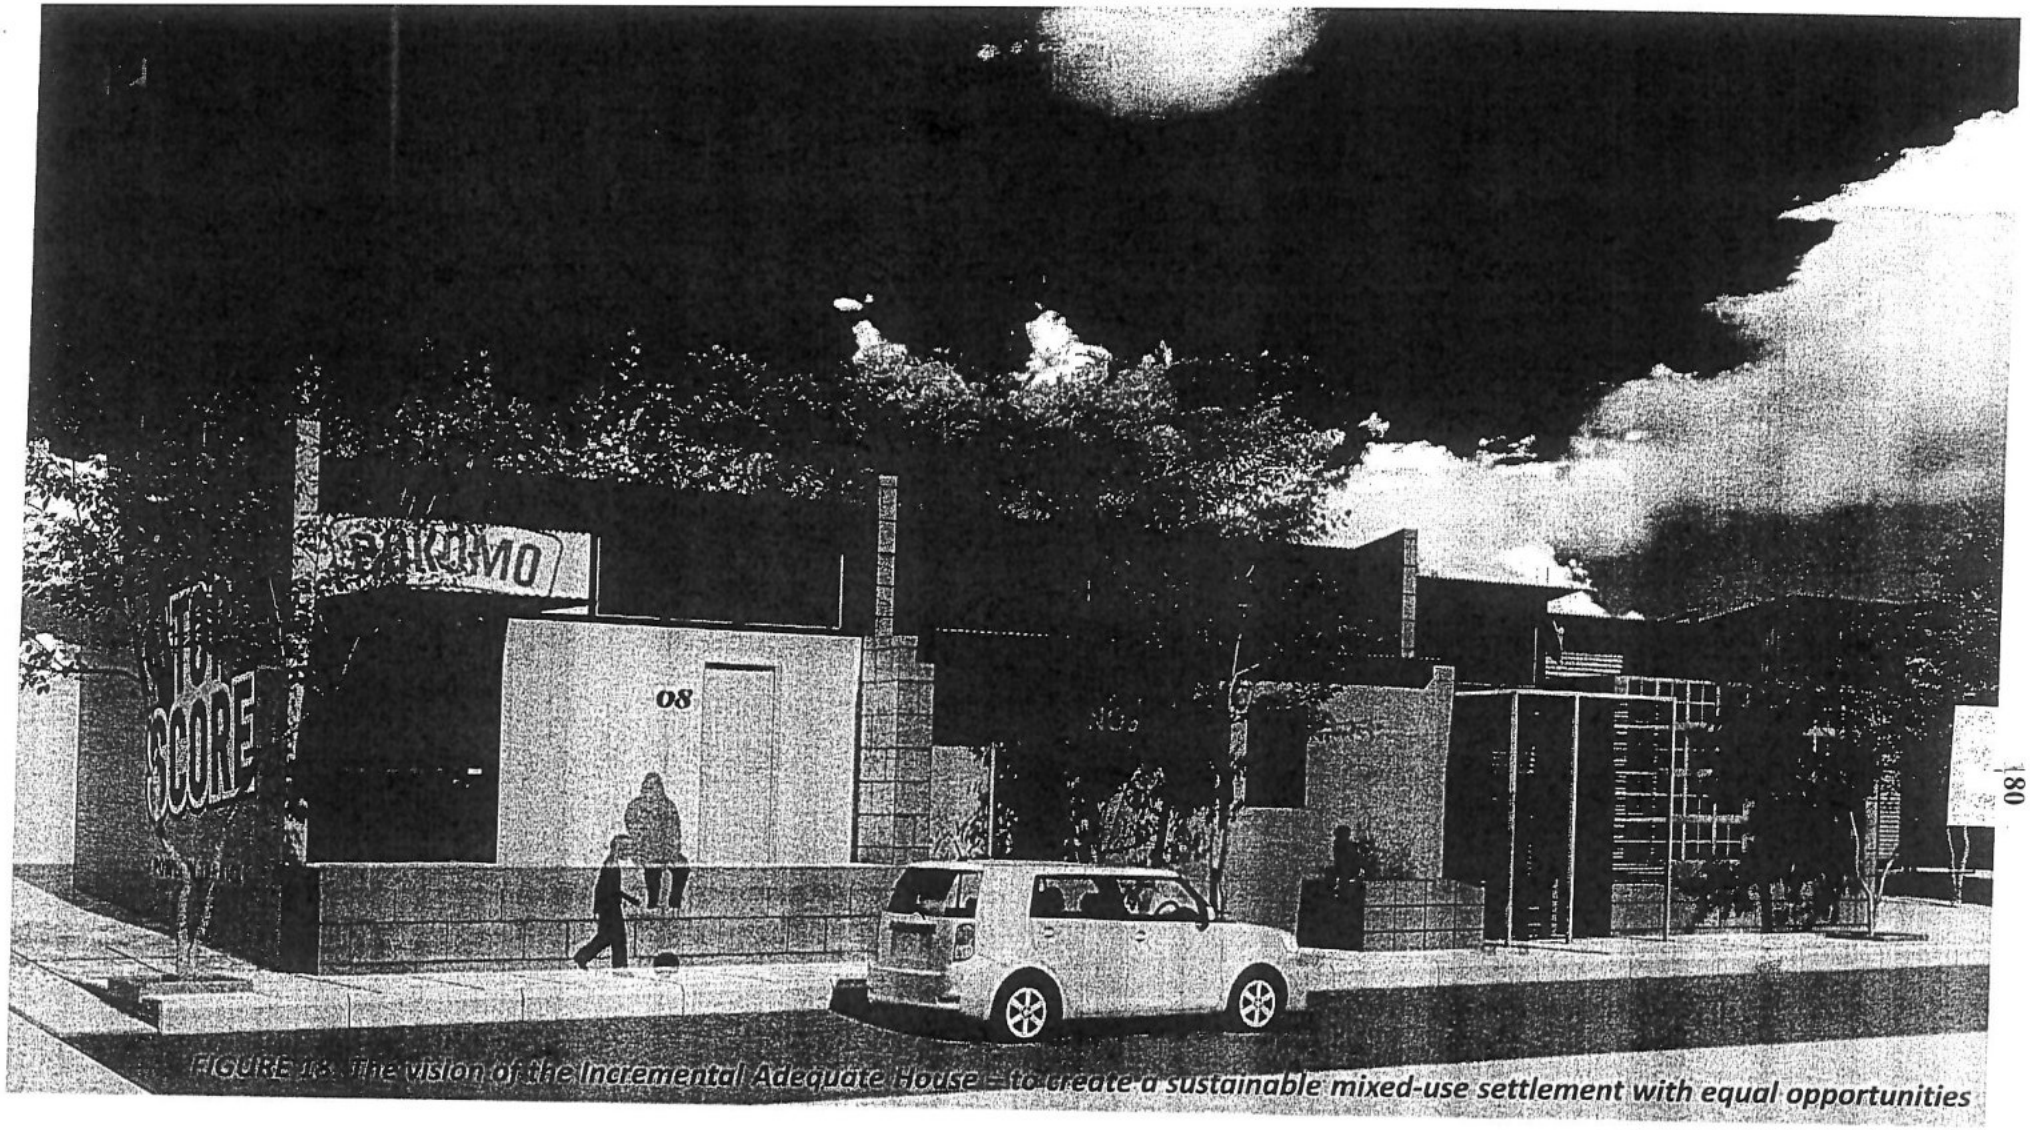

FIGURE 18: The vision of the Incremental Adequate House – to create a sustainable mixed-use settlement with equal opportunities

EMERGENCY RELOCATION IMPLEMENTATION

An implementation plan with milestones should be set-up beginning with the following:

1. Unit Prototype to be constructed by Metallum (**NUST**)
2. Official Approval of proposed Settlement Layout (**City of Windhoek**) *NUST to provide layout and follow-up*
3. Engineer's Approval of Housing Prototype (**City of Windhoek**)
4. Total project cost for 28 units including site preparation, development and bulk services needs to be established and approved even if these installations happen incrementally. (**City of Windhoek**)
5. Liaison with the families to be relocated to finalise design within settlement (**NUST**) *City of Windhoek to assist*
6. Plan submission of individual housing units (**NUST**) *dependent on City of Windhoek consent of the Settlement*
7. A budget for some investment in eventual landscaping and shared public infrastructure is recommended
8. As collaborators since the early stages Metallum should be appointed for all structural steel
9. Infill of units and fittings could always be handled by smaller SME contractors or City of Windhoek Vendors

1 POLICY STATEMENT

The Municipal Council of Windhoek (hereinafter referred to as the "**Council**") is mandated in terms of the Local Authority Act, Act No 23 of 1992 (as amended) to administer the local affairs of its stakeholders through planning, coordination and partnership in the delivery of Municipal services.

Municipal services include adequate and sustainable access to affordable serviced land and housing for the residents of Windhoek. To this end, the Council has elevated the focus of housing as a Strategic Focus Area of Council.

The constrained supply of serviced land and housing in urban areas is a key contributor to the high cost of housing in the market. While an increase in the supply of serviced land and in property development activities can ease supply and price pressure, targeted increase in the stock of affordable houses can specifically assist lower income households.

On the demand side, growth in the local economy, rural-urban migration, the search for employment opportunities and a rapidly growing middle-class has resulted in a demand for formal housing that exceeds the supply, particularly in urban centres. The Council has consequently been inundated with increasing demand for affordable housing.

In addition, climate change has perhaps become the biggest challenge faced by humanity in the 21st century and its impacts are already being felt in Windhoek as extreme events associated with climate change such as flash floods and high temperatures has led to loss of life, increased the severity and occurrence of diseases and has caused extensive damage to property. The provision of decent and affordable housing is a key component in adapting to extreme events associated with climate change and will improve the adaptive capacity of residents against the adverse effects of climate change.

The Council reiterates its declaration of housing as one of its development priorities. The role of the Council therefore, is to ensure that the housing development process is inclusive for all and that those households excluded from the market and conventional housing development mechanism are given the opportunity to access land, housing and services as well as creating an enabling environment for a vibrant housing market.

This Policy endeavors to set out the vision and intent of the Council regarding the provision of affordable housing and to provide a framework for such provision going forward. The vision of this Policy is to provide housing as a means of upgrading livelihoods and restoring the dignity of people whilst contributing to development of the built environment. This vision rests on the principles of partnership with relevant stakeholders, subsidization, quality, affordability, optimization and innovation.

The Policy recognizes key strategic challenges that must be overcome parallel to the implementation of the Policy in order to ensure the successful implementation of affordable housing and stipulates priorities, targets, commitments and strategies to achieve its objectives.

One of the fundamental challenges is the availability of funding to implement affordable housing programs and the Policy identifies several possibilities including repayment models that will make the provision of housing more affordable to those that really need it.

Community engagement and participation remain key to ensure that the solutions implemented are relevant and meet the needs of the intended beneficiaries.

The Council is cognizant that the provision of housing is a mandate of Central Government and aims to include government as a cardinal and vital stakeholder to ensure the actualization of this mammoth task which will be life changing to many residents of Windhoek.

1.1 Introduction

The provision of housing in Namibia remains a complex and challenging task for Local Authorities. The pressure on urban areas like Windhoek is becoming ever more serious, as demonstrated by the rapidly increasing urbanization rates over the last decade. Concurrently, the demand for housing and serviced land in cities, towns and settlements has surpassed supply.

The clearest evidence of the predicament of the provision of housing particularly to the medium to low-income members of our society is found in the mushrooming of informal settlements often unplanned and resulting in socio-economic consequences such as lack of economic opportunities, crime, pollution and disease outbreaks.

The plight for housing is one that has been evident for a long time given the mushrooming of informal settlement areas in Windhoek and considering the type of housing and the poor living conditions some of the residents reside in.

According to Maslow's hierarchy of needs, the most basic needs that must be met are the physiological needs which include food, water, sleep and warmth, followed by the next level of needs which include safety and security. The provision of housing and basic shelter therefore fulfills the most basic needs of providing an environment of sleep, warmth, safety and security.

The Namibian constitution further advocates for a life of dignity for all Namibians, living in peace, harmony and in a healthy and decent living environment.

The Central Government's efforts in addressing the need for housing across the country has resulted in the establishment and implementation of the Targeted Intervention Program for Employment and Economic Growth (TIPEEG) and Mass Urban Land Servicing program (MULSP) for development and servicing of land as well as the Build Together and Mass Housing Programs aimed at provision of housing to low-income households with no means of obtaining financing through financial institutions. The Government has defined the beneficiaries and methodology of award and has entrusted the implementation to Local Authorities. In addition, the Council has implemented the Windhoek Housing Scheme, which is provided for under sections 57 to 62 of the Local Authorities Act, 1992 (Act 23 of 1992) (as amended). The said Act further empowers the Council to construct houses under a Housing Scheme and to establish a Housing Revolving Fund to allow for the disbursement and repayment of loans in the execution of such scheme.

Over the years, all efforts by Central and Local Government have not resulted in the provision of housing at a rate required to meet the demand and as the demand kept growing due to urbanization and as the cost of living increased, it resulted in the housing market escalating to levels that most residents cannot afford. This continuous trend over many years, has resulted in the growth of the informal settlements to a level that is astronomical. The Council in 2017 took cognizance of the need to address the provision of housing and as such a decision was made for Council to enter the construction of housing space in an effort to expedite the provision of affordable housing. The division of Housing and Land Delivery was established towards the end of 2017 as part of Council's restructuring and transformational plan to specifically address the need for housing and serviced land.

The Council on 28 March 2019 approved the implementation of the Affordable Housing Program (CR 53/03/2019) to address the housing backlog in Windhoek and upgrade the Informal Settlements. The approved Affordable Housing Program is an improvement of the current housing schemes and aims to ensure the provision of completed housing units to beneficiaries, which are of an optimal quality and affordability. Although the compilation of policies and programs are necessary for the provision of housing, the commitment of funds to achieve such is of cardinal importance and the injection of funds for the construction of affordable housing must remain a priority if the Council is to achieve its aim of providing affordable land and housing to its residents.

This Policy sets out the intent of Council to provide affordable housing and provides the framework within which the Affordable Housing Program and similar future programs will be implemented.

1.2 Definitions

As part of framing an Affordable Housing Policy it is important to define affordable housing and the parameters that are involved. Defining Affordable Housing will also assist in creating the necessary targeted interventions aimed at making financing more accessible and providing other favourable mechanisms and terms in order to ensure that the final product is indeed affordable to the recipient.

Affordable Housing	means the provision of affordable shelter to beneficiaries aimed at addressing a basic housing need in line with their ability to pay, thus ensuring ownership and the restoration of dignity.
Affordable shelter	means adequate cover in terms of privacy, dignity, space, physical accessibility, security, lighting, heating and ventilation, and sanitation.
Beneficiaries	means residents who have benefited from the Affordable Housing Program of the Council
Co-application	means that an applicant can include another natural person to pledge towards the repayment of the housing loan either in addition to the applicant or in the event that the applicant is not able to honor the repayment of the loan.
Density	means the number of housing units per erf, usually expressed as number per square meter.
First time buyer	means a person who is not an owner of any other property in that local authority area as per the Local Authorities Act, (Act 23 of 1992 as amended)
Indigent	means a person who is extremely poor lacking the basic resources of normal life, often lacking not only money but a home as well

Lower middle income housing	means the provision of housing for beneficiaries that can afford a property (including erf) between N$450 000 and N$600 000. The target group for this category are nurses, teachers, police officers, army officers, bank clerks, municipal and government employees and similar.
Mixed Land Use	means an area of existing or proposed horizontal and/or vertical integration of suitable and compatible residential and non-residential land uses within the same area or on the same parcel of land; implies context appropriate intensity of land uses that should facilitate efficient public transport and a vibrant local urban environment.
Social Housing	means rental housing that is decent and safe owned by the local authority and made available to households whose income prevents them from securing a home loan. Social housing further serves people who don't have an income but are eligible for government grant or subsidy. Social housing includes both the option to rent only as well as rent to own.
Low-income housing	means the provision of housing for beneficiaries that can only afford a property (including subsidized erf) between N$220 000 and N$400 000. The target group for this category may include clerical and administrative staff in both public and private sector, artisans, municipal and government employees and similar.
Ultra-low income housing	means the provision of housing for beneficiaries that can only afford a property (including subsidized erf) between N$ 120 000 and N$ 150 000. The target group for this category may include cleaners, domestic workers, vendors, construction workers, security guards and similar.

2 STRATEGIC INTENT

2.1 Vision

The vision of this Policy is to provide housing as a means of upgrading livelihoods and restoring the dignity of people whilst contributing to development of the built environment.

2.2 Objectives

The objectives of this Policy are:

1) To provide the lower income beneficiaries within the city with incremental housing solutions in accordance with their levels of affordability.

2) To ensure residents obtain security of tenure.
3) To establish acceptable housing typologies for various income categories.
4) To facilitate access to credit/loan facilities for purchasing of a house.
5) To promote a safe and healthy built environment through decongestion of areas
6) To increase the quality of life by improving living conditions.
7) To continually research housing construction methods and technologies.

3 CONTEXT AND POLICY ENVIRONMENT

3.1 Development context

The provision of housing in addition to providing affordable shelter must also aim at creating a sustainable human habitat and environment. An integrated development approach must therefore be followed incorporating mixed land use which includes housing, schools, medical facilities, commercial services and other public amenities as part of the development of an area.

3.2 Policy and regulatory environment

Central and Local Government have identified housing as a priority area requiring intervention and commitment. The commitment to addressing the housing need is encapsulated in the formulation and adoption of various pieces of legislation and policy. The following legislative framework guides the implementation of this Policy:

The Constitution of the Republic of Namibia	Article 8 of the Constitution states that "the dignity of all persons shall be inviolable. No persons shall be subject to torture or to cruel, inhuman or degrading treatment or punishment". It has been purported that the lack of housing and some of the conditions of shelter in the informal settlements are tantamount to inhuman living conditions thus violating constitutional rights of some residents.
Vision 2030	This vision states "A prosperous and industrialized Namibia developed by her human resources, enjoying peace and harmony and political stability". One of the objectives is to ensure that Namibia is a fair, gender responsive, caring and committed nation in which all citizens are able to realize their full potential in a safe and decent living environment. The provision of affordable housing speaks to the importance of a safe and decent environment and is further emphasized in the various National Development Plans developed to implement the vision.
Harambee Prosperity Plan (HPP)	The provision of serviced land and housing falls under the Social Progression pillar of the HPP. The identified goals and outcomes in HPP 1 included the construction of 20 000 houses nation-wide, the servicing of 26 000 residential plots country wide, the construction of 50 000 rural toilets and the elimination of the

	bucket system by 2017. HPP 2 which was launched in March 2021, equally highlights provision of serviced erven and housing as priority.
The Flexible Land Tenure Act, 2012 (Act No. 4 of 2012)	The Act exists to create a new form of title to immovable property, to create a register for these forms of title and to register these and provide for the nature of their rights conferred by these forms of title. The Act provides for ownership of immovable property under starter title progressing to land hold title and eventually to freehold title.
The Local Authorities Act, (Act No.23 of 1992) (as amended)	The Mandate of the Local Authorities under the Act under section 30(t) includes the hiring, buying, acquiring, selling or disposing of any immovable property. Also included is the establishment of housing schemes and the administering of funds related to these schemes. The Local Authority is empowered to construct, acquire dwellings and maintain, sell or let the dwellings so constructed or acquired. The Local Authority may also grant loans to any person on first mortgage to the Local Authority Council over the land on which the dwelling has been constructed to enable the person to acquire or construct such dwelling for the accommodation of themselves or their dependents.
The National Housing Development Act, (Act No. 28 of 2000)	The Act provides for a National Housing Advisory Committee to administer the establishment of housing revolving funds by Local Authority and Regional Councils to regulate the allocation of funds and administration of Housing Revolving Funds and to establish decentralized Build Together Committees and regulate their functioning.
Trust Fund for Regional Development and Equity Provisions Act (Act 22 of 2000)	Act provides for the establishment of a Trust Fund for Regional Development and Equity Provisions and a Board of Trustees to manage the affairs of the Fund.
Environmental Management Act, (Act 7 of 2007)	The Act promotes the sustainable management of the environment and the use of natural resources by establishing principles for decision making on matters affecting the environment. It provides for a process of assessment and control of activities which may have significant effects on the environment.
Urban and Regional Planning Act (Act 5 of 2018)	The Act exists to consolidate the laws relating to urban and regional planning and provide the legal framework for spatial planning in Namibia. It also provides principles and standards relating to spatial planning and aims to decentralize matters pertaining to spatial planning.
Deeds Act of 2015 (Act 14 of 2015):	Consolidates and amend laws related to the registration of deeds.

Sectional Titles Act, (Act 2 of 2009)	The Act contains provisions related to the approval of sectional plans and registration of sectional plans and sectional titles and corresponding processes.
Municipality of Windhoek Building Regulations	The Building Regulations govern the erection of buildings within the Municipal Area, specifying standards for submission and approval of plans as well as conducting inspections during and after construction and issuing of completion certification once all building requirements have been met.
The National Housing Policy 2009	The Policy contains the National Housing goals, targets and commitments. It further sets out guiding principles, strategies and institutional roles and responsibilities to guide the provision of Housing on a National level.
Development and Upgrading Policy, July 2019	The Policy addresses the establishment of a set of land development options for the low and ultra-low income population. It specifies a range of standard level of services for these category of residents depending on affordability levels. It further contains guidelines and parameters within which upgrading of lower income townships may be upgraded in terms of order, tenureship and infrastructural services. It includes guidelines for facilitating self-help development and parameter for orderly urbanization management.
Windhoek Structure Plan	The structure plan aims to serve as a tool for furthering Council's determination to render affordable, effective services and infrastructure through the optimal and sustainable use of resources and technology and create economic development opportunities while applying sound environmental conservation principles. The plan contains the Council's long term Town planning vision, goals and objectives looking at current trends and predicting and guiding future development.
The Windhoek Town Planning Scheme	The purpose of the scheme is to promote the orderly development of the area to which the zoning scheme applies, to promote the health, safety and general well-being of the public and to determine land use rights and provide for control over land use rights and over the use of land in the area to which the zoning scheme applies.
Integrated Climate Change Strategy and Action Plan	The Windhoek Integrated Climate Change Strategy and Action Plan (WICCSAP) was developed to facilitate the Council's response to climate change. Housing has been identified in this strategy as one of the sectors that is vulnerable to the effects of climate change. The Affordable Housing Policy is therefore well positioned to contribute to Windhoek's climate change adaptation efforts by advocating for the provision of decent and affordable housing to residents thus increasing the adaptive capacity of the most vulnerable members of our society.

3.3 Strategic challenges

The provision of housing is faced with several strategic challenges, which are interrelated and cannot be addressed in isolation. Given the multi-sectoral nature of the challenges, they will need to be addressed by the various relevant stakeholders in parallel to the implementation of the Policy.

- *Town Planning and Township Proclamation processes*

The town planning and proclamation processes have been considered to be slow, cumbersome and costly. The time taken to proclaim townships has contributed to the slow rolling out of available land resulting in residents settling on sites that are unplanned leading to the creation of Informal Settlements. The process is such that transfer of property and security of tenure cannot be granted unless the planning process has been completed. Construction of services and housing also have to wait for the conclusion of the statutory processes, all resulting in delays in the process of delivering land. The introduction of decentralization of these services as provided for by the Urban & Regional Planning Act provide a relief in shortening and streamlining the planning processes.

- *Security of Tenure*

The process of ensuring security of tenure is one which although debated at length over the years has proven difficult to implement. The lengthy planning processes coupled with the inability to afford serviced land denies a vast majority of residents the opportunity to own land. The result is limited to no ownership of land in informal settlements. A concerted afford will have to be made if this situation is to change, as without the security of tenure, housing construction proves difficult. The introduction of the Flexible land tenure Act may contribute in ensuring security of tenure in phases thus allowing residents a clear process of how to move towards attaining free hold title.

- *Illegal occupation and land invasion*

The growing informal settlement makes it difficult to plan and construct services. Some people due to the length of time they have lived in the informal settlements are not willing to move or change even though they have settled illegally on Council land because of a sense of entitlement.

Most informal structures are constructed illegally and most erven contain more than one informal structure meaning that more land will be required to decongest if one is to construct any form of housing. The threat of land invasion is continuous and occupation in high risk areas places pressure on the allocation process. An approach is required to deal with illegal occupants who have settled for years on a particular site.

- *Access and availability of serviced land*

The cost of servicing of land is high and the Local Authority does not have resources to service adequate portions of land to accommodate the current demand.

The high cost of servicing, the limited and erratic funding and capacity to execute projects are all causing the rate of provision of serviced land to be slow. Most areas in the informal settlements are not serviced except with communal services which are not acceptable to the populace although the levels of services provided are aligned to the Development and Upgrading Policy of Council. The challenging topography, characterized by steep hills and rocky outcrops, makes construction of services costly and impossible in certain places for services to link to existing bulk services. There is limited availability of bulk services for connection and limited funds to honor the responsibility of Council in provision of bulk services. The solution would be for funds to be provided through contribution by the various developments and by continually setting aside a percentage of the income derived from land sales for provision of bulk services.

- *Human Resources*

There is a lack of adequate human resources capacity for work that is required, in terms of sufficiency and skills. This results in the slow pace of implementation and the constant need to procure external services which in itself is a cumbersome and costly process when required to follow all procurement procedures. The need to adequately resource the areas that are involved in the provision of serviced land and housing cannot be over emphasized.

- *Smart partnerships*

There is an absence of a Policy on Smart partnerships addressing land and housing resulting in limited or lacking partnerships with the private sector. Some of the partnerships engaged in to date have yielded complications during implementation, resulting in a very cautious approach to future partnerships. There is generally a lack of framework on how to engage the private sector, which will need to be improved because the private sector is a vital stakeholder in the provision of land and housing.

- *Subsidization formula*

The Council does not have a policy of subsidization of serviced land and housing, making it difficult to address the affordability of housing to lower income residents. An indigent Policy including a subsidization formula will address this short coming and allow all stakeholders to know how to deal with the vulnerable members of our society.

- *Urbanization*

Windhoek is faced with a challenge of a high rate of urbanization. Urbanization has contributed to a constant influx of residents to Windhoek in search of better opportunities. As a result, the informal settlements in Windhoek have seen unprecedented growth rates of up to 6.1% per annum between 2001 and 2011National Housing & Populational Census, while the formal part of the city grew at about 3-4% per annum. Unfortunately, in the absence of urbanization management strategy these residents mostly settle in the informal settlements thus adding to the backlog in the provision of housing. Failure to the manage this rate of

urbanization, will significantly affect Council's ability to provide housing to its residents and address the socio-economic and environmental challenges that are associated with informal settlements. Addressing urbanization requires a concerted effort by Central government in ensuring decentralization of services and opportunities so as to minimize the need to migrate to the Capital City for work opportunities and better living conditions. At the same time, it is vital for Council to institute measures that will curb the illegal occupation of land. This is an important prerequisite for the housing delivery program to eradicate informal housing in Windhoek.

- *Urban design and Smart City Concept*

A Smart City is one that is continually restoring its ability to govern itself more effectively, focusing on ensuring financial sustainability and initiatives that focus on technological advancement, cleanliness, best practices, vibrancy, green, affordability and innovation.

Application of the Smart City concept in the housing sphere refers to an integrated approach in the planning, development and upgrading of townships to include the provision of amenities such as medical facilities, early childhood education centers, internet of things, entertainment centers, pedestrian walkways, recreation/sport facilities, green spaces, retail and access to transportation among others close to where people reside.

Future urban design must accommodate Smart City concepts to avoid the need for people to move great distances to access basic amenities.

- *Outstanding and Historic debt*

Some of the applicants of the Affordable Housing Program under the Policy may fall in the category of residents in the process of repaying the land which they currently occupy and others may have debt in terms of payment for services. The Project specific implementation of this Policy as well as the allocation criteria to be approved by Council will have to address how applicants with historic debt will be handled.

3.4 Role players and stakeholders

The provision of housing requires an interdisciplinary approach and therefore includes a variety of internal and external stakeholders as stated below:

External Stakeholders

- Central Government
- Regional and Local Authorities
- State Owned Enterprises
- Private and Financial Sector
- Self-Help Groups and Housing Associations
- Tertiary institutions
- International Development Organizations

Internal Stakeholders:

- The Department and Division responsible for housing is the facilitating Department and Division for the implementation of the policy.
- All the Departments of the Municipal Council of Windhoek are internal stakeholders and thus vital to the successful implementation of the Policy.

4 PRINCIPLES OF THE POLICY

The following principles are integral to the Policy and form the basis of the implementation of the Housing Programs under the Policy:

4.1 Partnership between Public and Private Sector

While the Council is the lead agent and sets the development agenda within the borders of Windhoek, all identified stakeholders, including Central Government, private sector, development agencies, suppliers of building materials, members of the build environment, and the international community are expected to participate in meeting the housing challenges within the city.

This principle therefore calls on all stakeholders to contribute their skills, labor, creativity, financial and other resources to the housing development process in partnership and for mechanisms to be established in order to ensure engagement and collaboration among role players.

4.2 Subsidization

When considering the costs of provision of housing, the cost of the erf constitutes a significant portion making the attainment of housing difficult for many residents. In order to address the backlog in provision of housing, subsidization must be considered and applied. Local, Regional and National Government must subsidize the provision of serviced land to beneficiaries of the Affordable Housing Policy.

The beneficiaries targeted by this Policy are often unable to afford erf prices albeit at cost recovery. In order to achieve affordability, the erf prices may have to be subsidized at a rate to be determined by Council from time to time.

The subsidization model will be for the serviced erf only and only for the low and ultra-low-income categories. It is expected that the lower middle income housing beneficiaries are able to contribute fully towards the cost of the serviced erf and construction of the house and are therefore not subsidized.

In principle, the following generic subsidization model is proposed,

Housing in high rise developments:

- 90% of erf price for ultra-low income
- 80% of erf price for low income

Single residential erf price:

- 75% for ultra-low income
- 65% for low income

Subsidization of the low and ultra-low income housing is Council's contribution to improved access to shelter and making housing affordable to the urban poor. The model is subject to review every five (5) years in order to align it to Council objectives.

4.3 Quality and Affordability

Housing constructed under the Affordable Housing Program will be built according to local and international set standards and norms at a price that beneficiaries can afford. The investment must be a quality product that meets the objectives of the Affordable Housing Program and must have the ability to unlock economic and social benefit for the beneficiary. In order to further ensure quality, any construction using alternative technologies and methods will have to satisfy relevant certification as vetted by the relevant quality institutions both local and internationally.

Affordability is an important element when considering who qualifies for affordable housing and therefore affordability checks will be conducted in order to ascertain the beneficiary's ability to afford the repayment of the housing loan. The affordability check assesses among others if the beneficiary can afford the cost of the housing unit upon purchase and the corresponding long-term finance charges, insurance, municipal rates and taxes, municipal services and maintenance costs.

4.4 Optimization of Development Area

In order to address the backlog in the provision of housing and serviced land, this Policy promotes densification so as to accommodate an increased number of beneficiaries.

As part of the Affordable Housing Program, free-standing houses shall be constructed on an erf size of:

- not more than 200 square meters for low and ultra-low income beneficiaries and specifically in areas where residents already occupy/lease or own the land. Final erf size shall be in line with the Development and Upgrading Policy.

- not more than 300 square meters for lower middle income beneficiaries. Final erf size shall be in line with the Development and Upgrading Policy.

In addition, housing units shall be designed and constructed as sectional title, semi-detached and high rise (two level walk-ups), to house beneficiaries in the low and ultra-low income categories.

Where duplex/semi-detached type housing units is used, two families are able to share an erf thus translating to an erf size of at most 150 square meters per household.

4.5 Reservation of Erven

The Council shall continually identify pockets of available serviced land within built-up areas which can be used for the construction of houses as part of the implementation of the Affordable Housing Program.

4.6 Alignment with the Local Authorities Act

The provision of affordable housing will be done in accordance with the Local Authorities Act, 1992 (Act 23 0f 1992) as amended, specifically section 57 (establishment of housing schemes), section 58 (establishment of a housing fund), section 59 (pre-emptive right), section 60 (further loans for improved of dwellings acquired through the housing scheme), and section 61 (remedies against default of repayment of loans).

4.7 Pre-emptive Right

The provision of Affordable Housing is subject to restrictions in terms of pre-emptive rights on the houses constructed. Given that the housing and erf is subsidized for the purpose of serving as primary accommodation for the beneficiaries and/or their successors in title and that a loan is granted to the beneficiary for a pre-determined period of time, there will be a restriction preventing the owner from selling the house within a period calculated on the basis of one quarter of the period within which the loan granted is to be repaid as stated in section 59 (1-3) of the Local Authorities Act, 1992 (Act 23 of 1992)(as amended).

It shall be a condition of a loan granted under section 57(1)(b) of the Local Authorities Act, 1992 (Act No.23 of 1992) (as amended) that, notwithstanding the fact that the total amount of the loan, together with all interest thereon, has been repaid and that the mortgage bond which secured such loan has been cancelled by reason of such repayment, the person to whom the loan has been granted or his or her successors in title shall not sell or otherwise alienate any dwelling constructed or purchased by means of such loan within the period fixed in terms of section 59 (3) from the date of registration of such mortgage bond, unless he or she has first offered such dwelling for sale to the local authority council at a price determined in accordance with the provisions of section 59 (4).

There will be a registration against the Title Deed of the property on the following conditions:

- That the beneficiary shall not be entitled to sell the property to a third party or to any subsequent successor in title or successors in name or cede or assign the sale agreement to any third party or successor in title or name without the written consent of the Council.
- That the Council shall have a right of first refusal and may waive its right if good cause is established.

- That the beneficiary shall effect at its own cost the registration of the restrictive resale condition by way of notarial deed of imposition of condition against the Title Deed of the property.

4.8 Restrictive Conditions

The provision of Affordable Housing will be such that a beneficiary is only allowed to benefit from the Program once in their lifetime, this is to allow more beneficiaries access to the housing opportunity and prevent misuse and exploitation of the program. There will be further restrictions pertaining to participation in light of outstanding debts owed to the Council which will be contained within the loan agreement or criteria of award to beneficiaries. A beneficiary shall not be permitted to use the property as security/ collateral while the loan repayment period is in effect.

4.9 Innovation

The complexity of the housing crisis in Windhoek requires much more than conventional approaches to developing affordable housing. The crisis is not just about an enormous backlog, but also about a dysfunctional housing market as most beneficiaries cannot afford the minimum conventional housing option unless it is significantly subsidized. The response of the Council to this crisis must therefore be innovative and diverse in nature in terms of housing typologies and building technologies.

Apart from the conventional technology used in Namibia, this Policy advocates for Alternative Building Technologies. The Policy takes cognizance that using alternatives may be costlier at the onset, but advocates for spending more at the onset in order to minimize future running and maintenance costs.

The exploration of Alternative Building Technologies includes building materials and methods as well as, renewable energy and energy efficient technologies such as solar geysers and solar home systems. Housing units constructed as part of the Affordable Housing Program shall be fitted with solar geysers for energy efficiency and pre-paid services for ease of cost recovery. The objective of utilizing alternative technologies is to minimize cost and thereby make housing construction and maintenance more affordable in the long run.

All alternative building technologies to be used must have obtained the relevant certification (Agrement or similar)

5 TARGETS AND COMMITMENTS

The Policy primarily targets lower medium, low and ultra-low income beneficiaries and aims to provide housing solutions which will meet the needs of residents as follows:

- Residents requiring shelter but not necessarily wanting to own a house.
- Residents wanting housing but not being able to afford to own a house
- Residents who own an erf but cannot afford to construct a house.
- Residents who do not qualify for credit from the bank but who are able to pay in affordable installments if provided housing
- Residents who have the opportunity to buy a house through an Employer Scheme
- Residents who can obtain credit from the bank to build an affordable house but who do not currently own land

6 PRIORITIES

Given that the primary aim is to address the housing shortage and backlog and the provision of primary shelter to the needy. The priority categories in terms of allocation of housing units will include:

(a) First time buyers,

(b) Title deed owners,

(c) Owners of incomplete houses constructed under the Built Together Program,

(d) Residents with lease agreements and occupation certificates,

(e) Council employees.

In all priority categories, further preference will be given to people with disabilities, female headed households and youth. Further selection and prioritization of beneficiaries will be project specific and approved by Council. An Affordable Housing waiting list will be developed giving recognition to the existing Council waiting lists, either the existing master lists or project specific lists compiled through calls for the residents to partake in housing opportunities. This is to accommodate residents that prefer to purchase a house as opposed to those that only prefer to purchase an erf.

7 HOUSING STRATEGY

The following key components have been formulated to address the challenges and constraints identified within the housing sector in Windhoek:

7.1 Methods of Provision of Housing

The approach for the provision of housing is as follows:

(a) Provision of Housing through Mortgage Bonds

- Municipal,
- Financial Institutions.

(b) Provision of Housing through Housing Schemes

- Municipal Affordable Housing Program,
- Employer,

(c) *Provision of Social Housing*

- Rental with an option to buy,
- Rental only.

Primarily, the Policy advocates for residents to own instead of leasing the properties as a way of ensuring ownership and reducing the administrative burden associated with Social Housing on the Council. Priority will therefore be given to ownership rather than leasing.

7.2 Social Housing

Social Housing is provided by the Local Authority to a sector of the community that cannot afford to purchase a house or opt not to due to socio-economic circumstances. The rental is made affordable and may include indigent cases on a subsidized basis where National Government provides grants and subsidies. In cases of emergencies causing the emergence of vulnerable residents (e.g. flood or fire victims), both Central and Local Government will be approached to contribute towards the full subsidization of rental housing.

In addition, Social Housing will include an option of rent to own, which allows the lessee to eventually purchase the property. The specific modalities of this component of social housing will be developed and submitted for approval by Council as a project under the Affordable Housing Program. The management and maintenance of rental units remains the responsibility of the Council.

7.3 Types of Affordable Housing

The following types of housing will be made available using either Conventional or Alternative Building Technologies:

- Free standing housing but confined to a size of not more than 60 square meters with basic amenities.

- Semi-detached housing but confined to a size of not more than 60 square meters with basic amenities.

- Housing units in Two-Storey Walk-ups but confined to a size of not more than 60 square meters with basic amenities

7.4 Housing Standards

In addition to meeting the minimum requirements of the Building Control Regulations of the Council, all houses constructed under the Policy will at minimum contain the following basic amenities:

- Plumbing and sanitation fixtures (including toilet) inside the house,
- No ceiling and built-in-cupboards,
- Double brick foundation, with surface bed and damp-proof course,
- Single /Super/ Maxi brick or blocks above foundation,
- Basic flooring (No tiles),
- Paint finish,
- Fencing and Gate,
- Solar geyser.

All materials and finishes will be defined and costed to ensure uniformity of the quality and cost of the houses.

As far as possible, municipal services will be pre-paid.

All housing units will have pre-approved typologies from which beneficiaries can choose according to their preference. **(Typologies are attached as Annexure A).**

7.5 Funding

The funding for housing projects has been a challenge and it is a crucial component for the successful implementation of the Affordable Housing Program. Various financing models have been identified to be further explored as follows:

- *Council Capital Budget and Revolving Fund*

The Council shall on an annual basis provide for funding from its own resources for servicing of land and construction of housing for the ultra-low, low and lower middle income beneficiaries. The funds will be made available from the Housing and Land delivery revolving funds resourced through land sales and repayment of the houses.

- *Municipal bonds*

The Local Authorities Act under section 30(1)(v)(i) read together with section 80(1)(c) allows local authorities to borrow money by way of a loan or issue of debentures, bills of exchange or other negotiable instruments. The issue of debentures will be explored as an alternative source of funding for the construction of affordable housing.

- *Financiers*

Financial institutions including venture capitalists and non-banking financial institutions shall be approached to avail funding for the Affordable Housing Program. The Council will enter into a relationship with the Financier and will serve as a conduit for channeling of funds to various projects and repayment of such funds as per agreed terms.

Council shall approach local or international funding and donor agencies willing to provide resources (financial and/or technical) towards Affordable Housing for Public Private Partnerships and collaboration in assisting the Council to achieve its Affordable Housing objectives.

- *Government*

The Central Government has a constitutional and social responsibility to provide or facilitate the provision of housing for its citizens and must be a partner in the provision of affordable housing. Council shall approach Central Government for subsidies for the acquisition and servicing of land and construction of housing.

- *Employer Schemes*

Employers shall be approached to participate in the implementation of the Affordable Housing Program by serving as guarantor for employees or by providing a housing subsidy for employees to afford housing under the Program.

- *Mortgage*

Residents that can obtain bank guaranteed funding shall be funded through standard mortgage packages, pre-negotiated with the bank, offered to qualified categories. The Council shall facilitate consultations with Banking institutions for participation in the provision of affordable housing projects and where possible to consider and include in their funding models, the lower income categories which were previously not considered due to perceived risk.

7.6 Repayment and sustainability model

Beneficiaries who have qualified to obtain a house through the Affordable Housing Program will follow the Affordable Housing repayment model. The repayment model will include cash buyers, mortgage repayments or repayment through installments with Employers or Council and will vary depending on the category of beneficiary as follows:

(a) Beneficiaries not qualifying for bank guaranteed funding will be accommodated by the Council to advance the financing and repayment will take place by way of installments over a predetermined period at a fixed interest rate. In this option, co-application will be allowed in order to assist the vulnerable members such as the elderly or disabled.

(b) Beneficiaries who are able to purchase a house through an Employer scheme will have the Employer finance the house and the beneficiary will repay the Employer in installments over a period depending on the agreement between the parties. This can also be implemented for Council employees.

(c) Beneficiaries that qualify for credit from the commercial banks to build their house will obtain own financing and repay the bank directly based on the mortgage bond conditions.

(d) Beneficiary in a position to pay for their houses in full through cash payments will follow the relevant conveyancing procedures and protocols related to purchasing of property in cash.

(e) In the case of social housing, the rental payments will be governed by the rental agreement between the Council and the lessee.

In order to ensure sustainability of the Affordable Housing Program, the Council shall resource the Land delivery and Housing revolving funds where 60 % of all the funds generated from land delivery and 100% of funds from housing projects can be channeled and utilized to address the demand for land and housing as approved by Council (CR 53/03/2019).

8 IMPLEMENTATION AND RESPONSIBILITIES

8.1 Resources and capabilities

The implementation of the Policy will be facilitated by the Division of Housing and Land Delivery under the Department of Housing, Property Management and Human Settlement or its successor in function.

8.2 Housing management system

The availability of requisite resources and proper information management systems are essential ingredients for the implementation of this Policy. It requires mobilization and harnessing of all required resources within the Council.

A management system which includes a database will be developed and implemented to track and store all information pertaining to the Affordable Housing Program. The information contained includes details of beneficiaries and repayment of the loans. This will ease implementation and reporting and ensure proper record keeping and accountability.

8.3 Guidelines and criteria

A set of guidelines and criteria will be developed to guide the implementation process of the Affordable Housing Program. These are envisioned to vary with each Project depending on

whether the focus is informal settlements and brownfields or formal housing and green fields. Project specific guidelines and criteria will therefore be developed for each project as part of the inception plan and submitted for approval by Council prior to implementation and will comprise of among other the following:

- Criteria for selection of Beneficiaries
- Criteria for prioritization of Beneficiaries
- Guidelines and criteria for the alienation process of houses under the Affordable Housing Program
- Affordability criteria
- Guideline for repayment of housing loans and
- Any other guidelines and criteria as may be required during project implementation.

8.4 Community engagement

Community engagement, participation and involvement will be crucial to ensure that the beneficiaries of the Affordable Housing Program are engaged to gauge their needs in relation to what the Council is offering in terms of housing and to assess their affordability levels and willingness to pay for the housing opportunities provided.

9 IMPLEMENTATION PLAN

Once approved, the Policy will be disseminated to the various stakeholders and workshopped where necessary as a way of information sharing and sensitization. The aims and principles and strategies within the Policy will be implemented through the Affordable Housing Program.

An implementation plan for the Affordable Housing Program will be developed and reviewed annually. This Plan will highlight the various projects to be implemented under the Affordable Housing Program and will contain targets to be achieved with corresponding timelines, responsibilities and indicators. A typical implementation plan is attached as **Annexure B** and will be tailor-made for each specific project under the Affordable Housing Program.

10 MONITORING AND EVALUATION

The implementation of the Policy shall be monitored and evaluated against Project specific implementation plans (as outlined in 9 above) through regular assessment of progress towards the objective of providing affordable housing for all. Monitoring and evaluation shall thus form an integral part of the implementation plan and as such results will feed back into review processes of policy, strategy, programs and projects in order to respond, in a timely manner, to any constraints that may be identified during implementation.

11 CONCLUSION AND WAY FORWARD

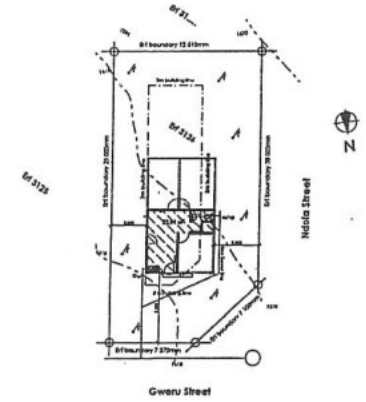

Council takes cognizance that the provision of affordable housing and access to basic services are vital to any growing city and instrumental in restoring a sense of dignity for its residents. Council also recognizes the significant backlog that exists and the challenges that have to be surmounted in order to address this mammoth task. This Policy aims to provide an overall strategic direction for implementation and execution of the Affordable Housing Program. It is envisaged that several projects will be implemented under the Program, such as the Informal Settlement Upgrading Housing Pilot Project currently under way. The Council admits that the only way to tackle this mammoth task is a phased approach to implementation of the Affordable Housing Program across Windhoek. The collaboration of the various stakeholders cannot be overemphasized as the success of implementing affordable housing requires synergies among the various stakeholders.

This Policy further takes cognizance that financing for housing is scarce and that Council resources are limited and therefore calls on Central government and other partners to join this quest of providing affordable housing. The Policy will however be implemented albeit with the limited funds available in hope that once the first few houses are constructed and handed over to beneficiaries, more funding will be made available by the respective financiers to assist in expediting and implementing this crucial local and national mandate.

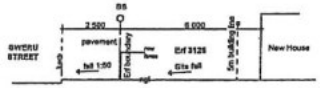

In conclusion, Council is convinced that the provision of affordable housing will upgrade economic conditions of many residents and contribute to a dignified existence and restoration of many hopes and aspirations, thus improving the overall social and economic fabric of society.

Summary: The range for Lower middle income category (house and erf included) is within the range N$ 450 000-N$ 600 000 , at a subsidized rate of 0% for the erf

4[Municipal Council Minutes: 1999-10-27]

8.2.1 **PBS.1 [PLA] ALLOCATION PRINCIPLES – RESIDENTIAL ERVEN IN LOW INCOME DEVELOPMENTS**
(L/6289/Kat) (L/6293/Kat) (L/4110/Kat) (L/467/Kat)(L/4764/Kat)

On a proposal by Councillor Dr B von Finckenstein it was

RESOLVED

1 That the conditions laid down by Council Resolution 433/10/94 (paragraphs 1 to 4), attached as page 12 to the agenda, and Council Resolution 61/03/98 (paragraph 11), attached as pages 13 – 14 to the agenda, be rescinded.

2 That the Allocation Policy, attached as pages 15 - 24 to the agenda, be accepted and implemented.

3 That the following Council resolutions on the allocation principles as was previously approved be rescinded (as the erven to be created are not registered yet):

3.1 Paragraph 8 of Council Resolution 472/11/97 on the subdivision of Erf 4110, Katutura Extension 2.

3.2 Paragraph 8 of Council Resolution 364/10/98 on the subdivision of Erf 6289, Katutura Extension 1.

3.3 Paragraph 11 of Council Resolution 61/03/98 on the subdivision of Erf 6293, Katutura Extension 1.

4 That the allocation principles be made applicable to the sale of the residential erven to be created through the subdivision of Erf 467, Katutura Proper as per Council Resolution 178/06/98 (paragraph 5).

5 That the allocation principles be made applicable to the subdivision of Erf 4764, Katutura Extension 12 as per Council Resolution 365/10/98.

6 That the allocation principles be discussed with community leaders, Regional Councillors and all other stakeholders.

7 That the Strategic Executive: Planning, Urbanisation and Environment be delegated the power in terms of section 31(1) of the Local Authorities Act, 1992 (Act 23 of 1992) to approve allocation of land to prospective tenants or purchasers wishing to lease or acquire land in the low income areas by private treaty in line with the above policy.

RESOLUTION 367/10/99

Also see the Item on the amendment of paragraph 5.5.4 as per Council Resolution 353/09/2007 below.

[Municipal Council Minutes: 2010-06-30]

8.4.16 **BRB.16 [CEO] REVISION OF ALLOCATION PRINCIPLES: POLICY ON THE ALLOCATION PRINCIPLES TO PROSPECTIVE TENANTS OR PURCHASERS WISHING TO LEASE OR ACQUIRE LAND IN THE LOW INCOME AREAS BY PRIVATE TREATY**
(LI/Areas)

On proposal by Councillor Ms E Trepper, it was

RESOLVED

1 That the conditions of allocations as per the document, attached as pages 594 – 600 to the agenda, for the allocation principles pertaining to prospective purchasers, prospective tenants and saving groups in low income areas be accepted as policy.

2 That the pre-finance option for all sales in the low income designated area be amended to be interest free.

3 That the allocation of erven to the National Housing Entreprise (NHE) as per Council Resolution be dealt with exclusively in a separate item to be submitted to Council for review.

4 That the Strategic Executive: Planning, Urbanisation and Environment be delegated the power in terms of section 31(1) of the Local Authorities Act, 1992 (Act 23 of 1992) to approve allocation of land to prospective tenants or purchasers wishing to lease or acquire land in the low income areas by private treaty in line with the above Policy.

RESOLUTION 184/06/2010

[Municipal Council Minutes: 2019-07-25]

9.5.1 **SOP.1 [HPH] REVISION OF THE DEVELOPMENT AND UPGRADING STRATEGY (DUS) AND THE CHANGE OF NAME FROM DEVELOPMENT AND UPGRADING STRATEGY (DUS) TO DEVELOPMENT AND UPGRADING POLICY (DUP)**
(3/3/12)

On proposal by Councillor Ms AK Ashilelo, it was

RESOLVED

1 That the proposed changes to the Development and Upgrading Strategy (DUS), attached as pages 177 - 194 to the agenda, under the new name Development and Upgrading Policy (DUP), attached as 195 – 245 to the agenda, be accepted to facilitate and guide development in informal settlements and on pieces of land associated thereto through upgrading projects.

2 That the Development and Upgrading Strategy (DUS) passed in 1999 through Council Resolution 372/10/99, attached as page 246 to the agenda, be rescinded and be replaced by this Policy.

3 That the Chief Executive Officer and the Strategic Executive: Housing, Property Management and Human Settlement be mandated to approach the Ministry of Urban and Rural Development to pursue the possibility of introducing a Subsidy Scheme with assistance of the Government which scheme would be aimed at funding the City's development programme targeting the City's ultra-low income communities.

4 That the Development and Upgrading Policy be accompanied by a list of projects with timelines and further that, Management Committee and Council be provided with quarterly progress reports on the upgrading projects for information on a continuous basis.

5 That it be made a Condition of Contract that whenever an upgrading take place, local people be employed in consultation with assigned Local Authority Councillors, Regional Councillors and Constituency Development Committees.
