

PUBLIC NOTICE

Outstanding TID Prepaid meters

The City of Windhoek would like to extend its sincere gratitude for your cooperation during the ongoing Token Identifier (TID) Rollover project.

The TID Rollover project involves resetting all pre-paid electricity and water meters by entering a token, a process carried out by City officials. Please note that the current system will expire on **24 November 2024**, and a token change is required to ensure your meter continues to work after this deadline.

We have encountered some challenges during the TID Rollover process, including difficulties accessing some premises. As a result, some prepayment meters remain un-updated. Hence, we kindly request all clients whose prepayment meters have not yet been updated to call or send us an email to set an appointment for the update by **08 November 2024**.

Please be aware that the below-listed electricity meters are still outstanding. If you do not contact us by 08 November 2024, these meters will be blocked, and the supply cable may be removed. Clients will be liable for the supply reconnection costs.
